Ordering and subscription information

This product, catalogue no. 62-011-XIE, is published monthly in electronic format at a price of CAN\$19.00 per issue and CAN\$175.00 for a one-year subscription. To obtain a single issue or to subscribe, visit our website at www.statcan.ca, and select Our Products and Services.

This product is also available as a standard printed publication at a price of CAN\$24.00 per issue and CAN\$233.00 for a one-year subscription. The following additional shipping charges apply for delivery outside Canada:

	Single issue	Annual subscription
United States	CAN\$6.00	CAN\$72.00
Other countries	CAN\$10.00	CAN\$120.00

All prices exclude sales taxes.

The printed version of this publication can be ordered

- by phone (Canada and United States) 1 800 267-6677
- by fax (Canada and United States) 1 877 287-4369
- by e-mail infostats@statcan.ca
- by mail

When notifying us of a change in your address, please provide both old and new addresses.

Standards of service to the public

Statistics Canada is committed to serving its clients in a prompt, reliable and courteous manner and in the official language of their choice. To this end, the Agency has developed standards of service which its employees observe in serving its clients. To obtain a copy of these service standards, please contact Statistics Canada toll free at 1 800 263-1136. The service standards are also published on www.statcan.ca under About Statistics Canada > Providing services to Canadians.

Note of Appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Symbols

The following standard symbols are used in Statistics Canada publications:

- . not available for any reference period
- .. not available for a specific reference period
- ... not applicable
- 0 true zero or a value rounded to zero
- 0° value rounded to 0 (zero) where there is a meaningful distinction between true zero and the value that was rounded
- P preliminary
- r revised
- x suppressed to meet the confidentiality requirements of the *Statistics Act*
- E use with caution
- F too unreliable to be published

Note on Cansim

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

® Registered Trade Mark of Statistics Canada.

Revision

Unless otherwise stated, price indexes in this publication are subject to revision for the most recent six months shown. Any revisions beyond these limits are so indicated.

This publication was prepared under the direction of:

- **George Beelen**, Director, Prices Division
- **Fred Barzyk**, Chief, Producer Prices Section

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.

Highlights

Monthly prices for manufactured goods at the factory gate were up in January, as prices for petroleum and primary metal products increased. Raw materials prices also rose in January, due to higher prices for crude oil.

Prices for manufactured goods increase

Prices charged by manufacturers, as measured by the Industrial Product Price Index (IPPI), were up 0.5% from December to January. Higher prices for petroleum products, primary metal and lumber products were the major contributors to this monthly increase.

The 12-month change in the IPPI was 2.2%, down from December's year-over-year increase of 2.6%, largely as a result of higher prices for petroleum products, chemical products and primary metal products, compared to one year ago.

The Raw Materials Price Index (RMPI) advanced 5.0% from December to January, following three months of decreases. The major contributors to this increase were mineral fuels, non-ferrous metals and vegetable products.

Compared to January of last year, raw materials cost factories 17.8% more, an increase similar to the 12-month change of 17.7% registered for December.

In January, the IPPI (1997=100) stood at 111.7, up from December's revised level of 111.1. The RMPI (1997=100) reached 155.5, up from a revised level of 148.1 in December.

IPPI: Prices for petroleum and primary metal products increase

On a monthly basis, manufacturers' prices were up 0.5%, mostly due to higher prices for petroleum products, primary metals and lumber products.

Petroleum and coal products prices increased 2.9%, compared to December. If petroleum and coal product prices had been excluded, the IPPI would have increased 0.3%, rather than 0.5%. Primary metal products rose 3.0%, as prices for aluminum, nickel, zinc and gold products increased, due to lower inventories and continuing strong demand.

Lumber and other wood products increased 1.6% from December to January. Higher prices were observed for softwood lumber and particleboard, as demand and construction activity increased due to milder weather.

Prices for non-metallic mineral products, pulp and paper products, as well as furniture and fixtures also recorded increases in January.

However, prices for chemical products fell 0.9% from the previous month, as lower prices were observed for organic industrial chemicals and synthetic resins.

Prices for motor vehicles, electrical and communication products, meat, fish and dairy products, as well as rubber, leather and plastic fabricated products also registered decreases from the previous month.

IPPI: Petroleum and chemical products are the major factors in the 12-month change

On a 12-month basis, the IPPI was up 2.2% in January, following an increase of 2.6% in December.

Prices for petroleum and coal products climbed 26.4% from January 2005, up from December's increase of 25.6%. If petroleum and coal product prices had been excluded, the IPPI would have increased 0.2%, rather than rising 2.2% from a year ago.

Chemical products increased 6.8%, due to higher prices for industrial type chemicals. Prices were also higher than one year ago for primary metals, rubber, leather and plastic fabricated products, fruit, vegetable and feed products, tobacco products, as well as furniture and fixtures.

On the other hand, prices for motor vehicles and other transport equipment, and electrical and communication products were down 3.9% and 0.6% respectively from a year ago, mainly as a result of a stronger Canadian dollar.

Lumber and other wood products declined 4.8% from January 2005 to January 2006, as year-over-year price decreases were recorded for softwood lumber, softwood plywood (excluding Douglas fir) and particleboard. Prices for pulp and paper products and meat, fish and dairy products were also down from a year ago.

RMPI: Crude oil prices are up

On a monthly basis, raw materials prices rose 5.0% in January, following three months of declines. Mineral fuels were up 7.7%, compared to December. Crude oil prices increased 6.5%, mainly due to supply concerns.

Prices for non-ferrous metals rose 6.4%, as prices increased for zinc concentrates, lead concentrates, gold and radio-active concentrates. Prices for vegetable products increased 2.8%, with higher prices for natural rubber, coffee and tobacco being reported.

However, ferrous materials fell 2.6% from the previous month, as prices were down for iron and steel scrap. Prices for animal and animal products declined 0.5%, as decreases were registered for hogs and cattle for slaughter.

On a 12-month basis, the price of raw materials advanced 17.8% in January, an increase similar to the 17.7% year-over-year change observed in December. Mineral fuels were up 28.2%, and crude oil prices rose 27.5%. If mineral fuels had been excluded, the RMPI would have increased 7.8% instead of rising 17.8%.

Raw materials prices are up

Prices for non-ferrous metals rose 35.6%, mainly because of higher prices for radio-active concentrates, zinc concentrates, copper concentrates and lead. Prices for vegetable products were up 4.1% from a year ago, due to year-over-year increases for natural rubber, coffee and unrefined sugar.

Animal and animal products, and non-metallic minerals also registered higher prices, compared to a year ago.

On the other hand, ferrous materials and wood products were down 9.2% and 5.8% respectively, compared to January 2005.

Impact of the exchange rate

Between December and January, the value of the Canadian dollar against the US dollar was up 0.3%. As a result, if the effect of exchange had been excluded, the total IPPI would have risen 0.6% instead of increasing of 0.5%.

On a 12-month basis, the value of the Canadian dollar rose 5.9% against its US counterpart. If the impact of the exchange rate had been excluded, producer prices would have risen 3.8% between January 2005 and January 2006, rather than increasing 2.2%.

Prices for intermediate goods increase

Prices for intermediate goods increased 0.7% from December. Higher prices for primary metal products, petroleum products, lumber products, pulp and paper products and non-metallic mineral products were the major contributors to the increase.

Lower prices for chemical products, meat, fish and dairy products, and tobacco products partially offset the monthly increase.

Producers of intermediate goods received 3.3% more for their goods in January 2006, compared to January 2005. Higher prices were registered for petroleum products, chemical products, primary metal products, rubber, leather and plastic fabricated products, fruit, vegetable and feed products, and non-metallic mineral products.

These increases were partly offset by lower prices for lumber products, motor vehicles, meat, fish and dairy products, and pulp and paper products.

Finished goods prices increase

On a monthly basis, prices for finished goods were up 0.4% from December. Higher prices for petroleum products, chemical products, fruit, vegetable and feed products, as well as furniture and fixtures were the principal contributors to this monthly rise. These increases were partially offset by lower prices for motor vehicles, and electrical and communication products.

Compared with January 2005, prices for finished goods were up by 0.7%. Higher prices for petroleum products, fruit, vegetable and feed products, tobacco products, rubber, leather and plastic fabricated products, chemical products, and furniture and fixtures were the major contributors to the annual increase.

Lower prices for motor vehicles, lumber products, electrical and communication products, machinery and equipment, and non-metallic mineral products partly offset the annual increase.

Note to readers

The **Industrial Product Price Index (IPPI)** reflects the prices that producers in Canada receive as the goods leave the plant gate. It does not reflect what the consumer pays. Unlike the Consumer Price Index, the IPPI excludes indirect taxes and all the costs that occur between the time a good leaves the plant and the time the final user takes possession of it, including the transportation, wholesale, and retail costs.

Canadian producers export many goods. They often quote their prices in foreign currencies, particularly for motor vehicles, pulp, paper, and wood products. Therefore, a rise or fall in the value of the Canadian dollar against its US counterpart affects the IPPI.

The **Raw Materials Price Index (RMPI)** reflects the prices paid by Canadian manufacturers for key raw materials. Many of these prices are set in a world market. Unlike the IPPI, the RMPI includes goods not produced in Canada.

Note: Indexes for the most recent six months shown are subject to revision.

1. The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM series number (v nnnnnnn) and a numeric descriptor. The numeric descriptor is of the order ss-mm-nn-pppp-rr where
- ss indicates the S-level commodity code (from 9 to 28)
 - mm indicates the M-level commodity code (from 14 to 43, 45 to 69)
 - nn indicates the M-level commodity split, or 91, which indicates a special aggregation or 99, which indicates special details
 - pppp indicates the PCGA code (except for some special aggregations which include several PCGAs)
 - rr indicates a split of a PCGA.

Note: Indexes for the most recent six months shown are subject to revision.

1. The aggregation of indexes by commodity or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.
2. The numeric code to the right of the CANSIM series number on the last line of each series is the 1997 North American Industry Classification System (NAICS) code.

Explanation of methods used and additional sources for industrial price indexes

Industrial Product Price Indexes (1997=100)

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 980 Principal Commodity Group Aggregates (PCGA) outputs as defined in the 1997 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures. Such indexes are derived from prices reported for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about four weeks after the reference month in Statistics Canada's *The Daily* (Catalogue 11-001-XIE) following a pre-announced schedule of release dates. Simultaneously, all the indexes become available on CANSIM in Tables 329-0038 to 329-0049 or by request.

Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

Price Surveys

About 9,000 prices are collected monthly from about 3,000 producers for goods sold, which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure. Important producers are «must take» respondents. A random selection is taken from the smaller producers. These samples are redrawn on a regular cycle as dictated by changes in the market. A directly surveyed elemental index is usually supported by 12 to 15 price quotes. An index may be derived from as few as 8 quotes or as many as 30 quotes.

About 700 of the 980 PCGAs in the manufacturing sector are accommodated by direct survey and these account for about 90% of the value of manufacturing output in 1997.

The price movement for the other PCGAs is estimated indirectly from either directly priced PCGAs or through borrowing price movement from other price series.

Weight Base

Commodity and industry weights are taken from the «Make» matrix of the 1997 Input/Output table which, in turn, is derived from 1997 values reported for the Survey of Manufacturers and edited to conform to the 1997 North American Industry Classification System. However, each December, company/product weights within a commodity index can be changed in order to reflect important changes in production patterns.

Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically, as required, in December of each year. Weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where w^i are the values of the output of each commodity:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in the base period;

$P_{t/o}^i$ is the price index for element i , meaning its price change from the base period to time t ;

\sum_i indicates summation over all elements i in the defined aggregate.

Historical Data

Historical series on the 1997 base for the Industry Price Indexes are available on CANSIM. The historical series are computed for the industry indexes classified under the 1997 North American Industry Classification System (NAICS) and for commodity indexes classified under the Principal Commodity Group Aggregates (PCGA) classification. The historical series were obtained by linking together movements from the 1997-based Industrial Product Price Indexes (IPPI) series and the corresponding 1992-based Industrial Product Price Indexes (IPPI) series, using 1997 as the linking period. A set of concordance tables between both sets of IPPI series are available to the public.

Reference Documents

62-558-XPB Industry Price Indexes, 1986=100: Users' Guide, \$40.00.

This publication describes briefly the economic content of the series and presents a short description of different aggregations produced. In the tables the weighting patterns (1986) for both commodities and commodity groupings are shown. Descriptions of the characteristics of the elemental indexes are provided. Comments on index use are also provided.

62-556-XPB Industrial Product Price Indexes, 1981=100, Concepts and Methods, \$25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described, as are index calculation and aggregation procedures. A glossary of terms is also provided.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613) 951-9606, facsimile (613) 951-1539, Internet address infounit@statcan.ca.

Raw materials price indexes (1997 = 100)

The Raw Materials Price Indexes (RMPI) measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example, wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1997 time base, are published monthly in Statistics Canada's The Daily approximately four weeks after the end of the reference month. They are also available at that time on CANSIM in Table 330-0006.

Historical Data

The new historical series were obtained by linking together movements from the 1997-based Raw Material Price Indexes (RMPI) series and the corresponding 1992-based Raw Material Price Indexes (RMPI) series, using the year 1997 as the linking period. An explanatory note on the methods used to compute the historical series, as well as a set of concordance tables between both sets of RMPI series are available to the public.

Coverage

The index covers purchases of imported and domestically produced goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes net paid and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not

available, prices are taken for a similar commodity at the next stage of processing as occurred for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

Weight Base

Weights were derived from the 1997 Input/Output tables which provide values at purchasers' prices of commodities purchased as intermediate inputs.

Within individual commodity indexes, the prices are weighted according to their market share in a recent year. In a few instances, where data are not available, the price quotations are equally weighted.

Formula

Indexes for aggregates of individual raw materials are calculated according to the following formula:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in 1997;

$P_{t/o}^i$ is the price index for element i , meaning its price change from the base period o to time t ;

\sum_i indicates summation over all elements i in the defined aggregate.

Reference Document

See reference document in IPPI.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario, K1A 0T6, telephone (613) 951-9606, facsimile (613) 951-1539, Internet address infounit@statcan.ca.

Electric Power Selling Price Indexes, Non-residential, (1997=100)

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales; for bills less than 5000 kW and for sales of 5000 kW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1997 as a time reference base and the weights used are 1992 company revenues from sales of electricity, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described in the explanation of methods used for the Industrial Product Price Indexes, 1997=100. The indexes are available on CANSIM in Table 329-0050. Indexes for the current year and the previous year are subject to revision.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613) 951-9606, facsimile (613) 951-1539, Internet address infounit@statcan.ca.

MERCI DE VOTRE COMMANDE!

Looking for health information online?

Link up with Statistics Canada's *Guide to Health Statistics!*

The *Guide to Health Statistics* is a series of **online links** that lead you to health information published by Statistics Canada.

Let www.statcan.ca's *Guide to Health Statistics* be your passage to the world of health information. In the Guide you'll discover links to:

- ➔ vital statistics
- ➔ cancer statistics
- ➔ health determinants
- ➔ health status
- ➔ health care issues
- ➔ and much more. . .

Find the information you need now. Link up to a host of online products, documents and surveys like the National Population Health Survey. The *Guide to Health Statistics* allows you to search and locate exactly what you're looking for.

Save time. A few clicks and you'll be connected to health information from www.statcan.ca, your source for health facts and analysis.

Access anywhere, anytime. You get current detailed information quickly and efficiently thanks to continuous updates, regardless of location and time constraints.

Put the data to work. Copy text from online right into your documents and databases.

Expertise you can trust!

You can count on relevant dependable information with a unique focus on Canada-wide indicators from Statistics Canada. So, when you're on the lookout for first-rate health facts and analysis, allow the *Guide to Health Statistics* on www.statcan.ca to be your bridge to health information.

It's easy! Visit our site at www.statcan.ca, click on Canadian Statistics and then choose Health. Click on the *Guide to Health Statistics* banner and let your mouse lead the way.

Bookmark it!

Here are some of the handy links you'll find in the *Guide to Health Statistics*

Note of Appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Symbols

The following standard symbols are used in Statistics Canada publications:

- . not available for any reference period
- .. not available for a specific reference period
- ... not applicable
- 0 true zero or a value rounded to zero
- 0^s value rounded to 0 (zero) where there is a meaningful distinction between true zero and the value that was rounded
- ^P preliminary
- ^r revised
- x suppressed to meet the confidentiality requirements of the *Statistics Act*
- ^E use with caution
- F too unreliable to be published

Note on Cansim

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

® Registered Trade Mark of Statistics Canada.

Revision

Unless otherwise stated, price indexes in this publication are subject to revision for the most recent six months shown. Any revisions beyond these limits are so indicated.

This publication was prepared under the direction of:

- **George Beelen**, Director, Prices Division
- **Fred Barzyk**, Chief, Producer Prices Section

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.

Highlights

Monthly prices for manufactured goods at the factory gate were down in February, as lower prices were registered for petroleum products. Raw materials prices also decreased in February, as prices for crude oil and natural gas declined.

Prices charged by manufacturers, as measured by the Industrial Product Price Index (IPPI), were down 0.4% from January to February. Lower prices for petroleum, lumber and chemical products were the major contributors to this monthly decrease.

Prices for manufactured goods decrease

The 12-month change in the IPPI was 0.6%, a significant decrease from January's year-over-year increase of 2.3%. Higher prices for petroleum products and chemical products were the major contributors to this annual increase.

The Raw Materials Price Index (RMPI) was down 3.2% from January to February, following an increase of 4.9% in January and due to lower prices for mineral fuels and animals and animal products.

Compared to February of last year, raw materials cost factories 10.6% more, down from the 12-month change of 17.7% in January.

In February, the IPPI (1997=100) stood at 111.3, down from January's revised level of 111.8. The RMPI (1997=100) reached 150.3, down from a revised level of 155.3 in January.

IPPI: Prices for petroleum products decline

On a month-over-month basis, manufacturers' prices were down 0.4%, mainly due to lower prices for petroleum, lumber and chemical products.

Petroleum and coal products prices decreased 5.0% compared to January. If petroleum and coal product prices had been excluded, the IPPI would have remained unchanged from January rather than decreasing 0.4%.

Lumber and other wood products decreased 1.0% from January to February. Lower prices were observed for softwood lumber and particleboard due to lower demand.

Chemical products fell 0.7% from the previous month as lower prices were observed for industrial chemicals and fertilizers.

Prices for motor vehicles, rubber, leather and plastic fabricated products, machinery and equipment as well as electrical and communication products also registered decreases from the previous month.

However, prices for primary metal products rose 1.6% as prices for aluminum and nickel products increased due to continuing strong demand. Prices for pulp and paper products as well as meat, fish and dairy products also increased in February.

IPPI: Petroleum and chemical products are the major factors in the 12-month change

On a 12-month basis, the IPPI was up 0.6% in February, a significant change from the 2.3% increase in January.

Prices for petroleum and coal products rose 14.5% from February 2005, down from January's increase of 26.3%. If petroleum and coal product prices had been excluded, the IPPI would have decreased 0.7%, rather than increasing 0.6% from a year ago.

Chemical products increased 4.9%, due to higher prices for synthetic resins and inorganic industrial chemicals. Prices were also higher than one year ago for primary metals, rubber, leather and plastic fabricated products, fruit, vegetable and feed products, tobacco products, non-metallic mineral products and furniture and fixtures.

On the other hand, motor vehicles and other transport equipment prices and electrical and communication products were down 5.3% and 1.1% respectively from a year ago, mainly as a result of a stronger Canadian dollar.

Lumber and other wood products declined 8.3% from February 2005 to February 2006, as year-over-year price decreases were recorded for softwood lumber (-10.9%) and particleboard (-20.9%). Prices for pulp and paper products, meat, fish and dairy products as well as metal fabricated products were also down from a year ago.

RMPI: Lower prices for crude oil and natural gas

On a monthly basis, raw material prices fell 3.2% in February, following an increase of 4.9% in January. Mineral fuels were down 6.0% compared to January. Crude oil prices decreased 6.4%, mainly due to high inventories. Natural gas prices declined 4.7% as milder weather reduced demand and inventories remained high.

Raw materials prices are down

Prices for animal and animal products fell 2.2% as decreases were registered for cattle for slaughter and unprocessed whole milk.

However, prices for non-ferrous metals rose 1.4%, mainly due to higher prices for radio-active concentrates, zinc concentrates and non-ferrous metal scrap. Ferrous materials increased 2.1% from the previous month as prices were up for iron and steel scrap. Prices for wood and vegetable products also increased from the previous month.

On a 12-month basis, the price of raw materials rose 10.6% in February, down from the 17.7% year-over-year increase in January. Mineral fuels were up 14.6%, with crude oil prices rising 12.2%. If mineral fuels had been excluded, the RMPI would have increased 6.6% instead of rising 10.6%.

Prices for non-ferrous metals rose 31.2%, mainly because of higher prices for radio-active concentrates, zinc concentrates, copper concentrates, gold and lead. Prices for vegetable products were up 2.5% from a year ago due to year-over-year increases for natural rubber, unrefined sugar and corn. Higher prices from a year ago were also observed for non-metallic minerals.

On the other hand, wood products and ferrous materials were down 4.5% and 9.1% respectively compared to February 2005.

Impact of the exchange rate

Between January and February, the value of the Canadian dollar against the US dollar was up 0.7%. As a result, the total IPPI excluding the effect of the exchange would have fallen 0.2% instead of its actual decrease of 0.4%.

On a 12-month basis, the value of the Canadian dollar rose 7.9% against the US dollar. If the impact of the exchange rate had been excluded, producer prices would have risen 2.7% between February 2005 and February 2006, rather than their actual increase of 0.6%.

Prices for intermediate goods are down

Prices for intermediate goods decreased 0.3% from January. Lower prices for petroleum products, chemical products, lumber products, rubber, leather and plastic fabricated products as well as fruit, vegetable and feed products were the major contributors to the decrease.

Higher prices for primary metal products and pulp and paper products partially offset the monthly decrease.

Producers of intermediate goods received 1.6% more for their goods in February 2006 than the same month a year earlier. Higher prices were registered for petroleum products, chemical products, primary metal products, rubber, leather and plastic fabricated products, fruit, vegetable and feed products and non-metallic mineral products.

These increases were partly offset by lower prices for lumber products, motor vehicles, pulp and paper products, meat, fish and dairy products and electrical and communication products.

Finished goods prices decrease

On a monthly basis, prices for finished goods were down 0.8% from January. Lower prices for petroleum products, motor vehicles, rubber, leather and plastic fabricated products, chemical products and electrical and communication products were the major contributors to this monthly drop.

These increases were partially offset by higher prices for meat, fish and dairy products, fruit, vegetable and feed products and pulp and paper products.

Compared with February 2005, prices for finished goods were down by 1.0%. Lower prices for motor vehicles, lumber products, electrical and communication products, and machinery and equipment were the major contributors to this decrease.

Higher prices for petroleum products, fruit, vegetable and feed products, tobacco products, furniture and fixtures, chemical products, rubber, leather and plastic fabricated products and non-metallic mineral products partly offset the annual decrease.

Note to readers

The **Industrial Product Price Index (IPPI)** reflects the prices that producers in Canada receive as the goods leave the plant gate. It does not reflect what the consumer pays. Unlike the Consumer Price Index, the IPPI excludes indirect taxes and all the costs that occur between the time a good leaves the plant and the time the final user takes possession of it, including the transportation, wholesale, and retail costs.

Canadian producers export many goods. They often quote their prices in foreign currencies, particularly for motor vehicles, pulp, paper, and wood products. Therefore, a rise or fall in the value of the Canadian dollar against its US counterpart affects the IPPI.

The **Raw Materials Price Index (RMPI)** reflects the prices paid by Canadian manufacturers for key raw materials. Many of these prices are set in a world market. Unlike the IPPI, the RMPI includes goods not produced in Canada.

Note: Indexes for the most recent six months shown are subject to revision.

- The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM series number (v nnnnnnn) and a numeric descriptor. The numeric descriptor is of the order ss-mm-nn-pppp-rr where
ss indicates the S-level commodity code (from 9 to 28)
mm indicates the M-level commodity code (from 14 to 43, 45 to 69)
nn indicates the M-level commodity split, or 91, which indicates a special aggregation or 99, which indicates special details
pppp indicates the PCGA code (except for some special aggregations which include several PCGAs)
rr indicates a split of a PCGA.

		2006	108.9	109.2
All other miscellaneous manufacturing														
v3822799	33999	2005	113.1	113.5	113.5	114.3	114.5	114.5	114.0	114.1	113.8	114.3	114.6	114.1
		2006	116.2	116.1

Note: Indexes for the most recent six months shown are subject to revision.

1. The aggregation of indexes by commodity or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.
2. The numeric code to the right of the CANSIM series number on the last line of each series is the 1997 North American Industry Classification System (NAICS) code.

Explanation of methods used and additional sources for industrial price indexes

Industrial Product Price Indexes (1997=100)

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 980 Principal Commodity Group Aggregates (PCGA) outputs as defined in the 1997 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures. Such indexes are derived from prices reported for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about four weeks after the reference month in Statistics Canada's *The Daily* (Catalogue 11-001-XIE) following a pre-announced schedule of release dates. Simultaneously, all the indexes become available on CANSIM in Tables 329-0038 to 329-0049 or by request.

Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

Price Surveys

About 9,000 prices are collected monthly from about 3,000 producers for goods sold, which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure. Important producers are «must take» respondents. A random selection is taken from the smaller producers. These samples are redrawn on a regular cycle as dictated by changes in the market. A directly surveyed elemental index is usually supported by 12 to 15 price quotes. An index may be derived from as few as 8 quotes or as many as 30 quotes.

About 700 of the 980 PCGAs in the manufacturing sector are accommodated by direct survey and these account for about 90% of the value of manufacturing output in 1997.

The price movement for the other PCGAs is estimated indirectly from either directly priced PCGAs or through borrowing price movement from other price series.

Weight Base

Commodity and industry weights are taken from the «Make» matrix of the 1997 Input/Output table which, in turn, is derived from 1997 values reported for the Survey of Manufacturers and edited to conform to the 1997 North American Industry Classification System. However, each December, company/product weights within a commodity index can be changed in order to reflect important changes in production patterns.

Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically, as required, in December of each year. Weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where w are the values of the output of each commodity:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in the base period;

$P_{t/o}^i$ is the price index for element i , meaning its price change from the base period to time t ;

\sum_i indicates summation over all elements i in the defined aggregate.

Historical Data

Historical series on the 1997 base for the Industry Price Indexes are available on CANSIM. The historical series are computed for the industry indexes classified under the 1997 North American Industry Classification System (NAICS) and for commodity indexes classified under the Principal Commodity Group Aggregates (PCGA) classification. The historical series were obtained by linking together movements from the 1997-based Industrial Product Price Indexes (IPPI) series and the corresponding 1992-based Industrial Product Price Indexes (IPPI) series, using 1997 as the linking period. A set of concordance tables between both sets of IPPI series are available to the public.

Reference Documents

62-558-XPB Industry Price Indexes, 1986=100: Users' Guide, \$40.00.

This publication describes briefly the economic content of the series and presents a short description of different aggregations produced. In the tables the weighting patterns (1986) for both commodities and commodity groupings are shown. Descriptions of the characteristics of the elemental indexes are provided. Comments on index use are also provided.

62-556-XPB Industrial Product Price Indexes, 1981=100, Concepts and Methods, \$25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described, as are index calculation and aggregation procedures. A glossary of terms is also provided.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613) 951-9606, facsimile (613) 951-1539, Internet address infounit@statcan.ca.

Raw materials price indexes (1997 = 100)

The Raw Materials Price Indexes (RMPI) measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example, wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1997 time base, are published monthly in Statistics Canada's The Daily approximately four weeks after the end of the reference month. They are also available at that time on CANSIM in Table 330-0006.

Historical Data

The new historical series were obtained by linking together movements from the 1997-based Raw Material Price Indexes (RMPI) series and the corresponding 1992-based Raw Material Price Indexes (RMPI) series, using the year 1997 as the linking period. An explanatory note on the methods used to compute the historical series, as well as a set of concordance tables between both sets of RMPI series are available to the public.

Coverage

The index covers purchases of imported and domestically produced goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes net paid and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not

available, prices are taken for a similar commodity at the next stage of processing as occurred for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

Weight Base

Weights were derived from the 1997 Input/Output tables which provide values at purchasers' prices of commodities purchased as intermediate inputs.

Within individual commodity indexes, the prices are weighted according to their market share in a recent year. In a few instances, where data are not available, the price quotations are equally weighted.

Formula

Indexes for aggregates of individual raw materials are calculated according to the following formula:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in 1997;

$P_{t/o}^i$ is the price index for element i , meaning its price change from the base period o to time t ;

\sum_i indicates summation over all elements i in the defined aggregate.

Reference Document

See reference document in IPPI.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario, K1A 0T6, telephone (613) 951-9606, facsimile (613) 951-1539, Internet address infounit@statcan.ca.

Electric Power Selling Price Indexes, Non-residential, (1997=100)

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales; for bills less than 5000 kW and for sales of 5000 kW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1997 as a time reference base and the weights used are 1992 company revenues from sales of electricity, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described in the explanation of methods used for the Industrial Product Price Indexes, 1997=100. The indexes are available on CANSIM in Table 329-0050. Indexes for the current year and the previous year are subject to revision.

The Daily Routine

FREE
at
www.statcan.ca

Statistics Canada's
official release bulletin,
every working day
at 8:30 a.m. (Eastern time)

This morning, like every morning, you:

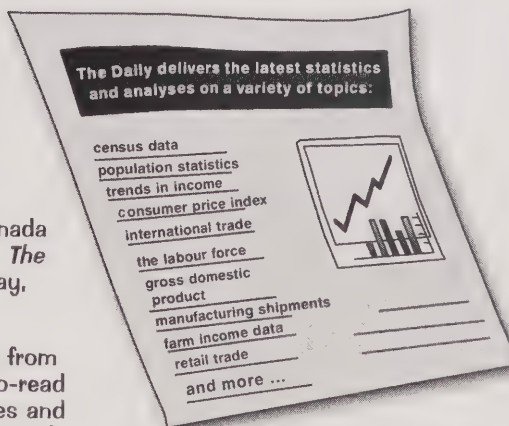

Is that right? You didn't read *The Daily*? Did you know that it's
the best statistical information source in the country?

Each working day, *The Daily* provides economic and social data that's available free of charge on our Web site. Journalists never miss it. Business leaders and policy makers use it to make sound decisions.

All new data from Statistics Canada must be officially announced in *The Daily*. So if you read it every day, you don't miss a thing!

The Daily delivers news directly from Statistics Canada—with easy-to-read news releases, informative tables and simple charts that clearly illustrate the news.

Subscribe to *The Daily*
on the Internet.
It's **FREE**.

Visit www.statcan.ca to read
The Daily when you need it.
Or subscribe to the free online
delivery service and receive
The Daily automatically
by e-mail.

Add it to your
day-to-day activities...
a good way to add
substance to your *Daily* routine!

Looking for health information online?

Link up with Statistics Canada's *Guide to Health Statistics!*

The *Guide to Health Statistics* is a series of **online links** that lead you to health information published by Statistics Canada.

Let www.statcan.ca's *Guide to Health Statistics* be your passage to the world of health information. In the Guide you'll discover links to:

- ➔ vital statistics
- ➔ cancer statistics
- ➔ health determinants
- ➔ health status
- ➔ health care issues
- ➔ and much more. . .

Find the information you need now. Link up to a host of online products, documents and surveys like the National Population Health Survey. The *Guide to Health Statistics* allows you to search and locate exactly what you're looking for.

Save time. A few clicks and you'll be connected to health information from www.statcan.ca, your source for health facts and analysis.

Access anywhere, anytime. You get current detailed information quickly and efficiently thanks to continuous updates, regardless of location and time constraints.

Put the data to work. Copy text from online right into your documents and databases.

Expertise you can trust! You can count on relevant dependable information with a unique focus on Canada-wide indicators from Statistics Canada. So, when you're on the lookout for first-rate health facts and analysis, allow the *Guide to Health Statistics* on www.statcan.ca to be your bridge to health information.

It's easy! Visit our site at www.statcan.ca, click on Canadian Statistics and then choose Health. Click on the *Guide to Health Statistics* banner and let your mouse lead the way.

Bookmark it!

Here are some of the handy links you'll find in the *Guide to Health Statistics*

Links to insightful analysis and data on:

➔ Cancer

Health Surveys

- ➔ Canadian Community Health Survey (CCHS)
- ➔ National Population Health Survey (NPHS)
- ➔ Smoking and Tobacco Use Surveys
- ➔ Health Care
- ➔ Therapeutic Abortions
- ➔ Vital Statistics

Sample links to related sites:

- ➔ Canadian Cancer Statistics
- ➔ Canadian Institute for Health Information (CIHI)
- ➔ Health Canada

Accessing and ordering information

This product, catalogue no. 62-011-XIE, is available for free in electronic format. To obtain a single issue, visit our website at www.statcan.ca and select Our Products and Services.

This product, catalogue no. 62-011-XPE, is also available as a standard printed publication at a price of CAN\$19.00 per issue and CAN\$233.00 for a one-year subscription.

The following additional shipping charges apply for delivery outside Canada:

	Single issue	Annual subscription
United States	CAN\$6.00	CAN\$72.00
Other countries	CAN\$10.00	CAN\$120.00

All prices exclude sales taxes.

The printed version of this publication can be ordered by

- Phone (Canada and United States) 1 800 267-6677
- Fax (Canada and United States) 1 877 287-4369
- E-mail infostats@statcan.ca
- Mail Statistics Canada
Finance Division
R.H. Coats Bldg., 6th Floor
120 Parkdale Avenue
Ottawa (Ontario) K1A 0T6
- In person from authorised agents and bookstores.

When notifying us of a change in your address, please provide both old and new addresses.

Standards of service to the public

Statistics Canada is committed to serving its clients in a prompt, reliable and courteous manner and in the official language of their choice. To this end, the Agency has developed standards of service which its employees observe in serving its clients. To obtain a copy of these service standards, please contact Statistics Canada toll free at 1 800 263-1136. The service standards are also published on www.statcan.ca under About Statistics Canada > Providing services to Canadians.

Note of Appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Symbols

The following standard symbols are used in Statistics Canada publications:

- . not available for any reference period
- .. not available for a specific reference period
- ... not applicable
- 0 true zero or a value rounded to zero
- 0^o value rounded to 0 (zero) where there is a meaningful distinction between true zero and the value that was rounded
- ^P preliminary
- ^r revised
- x suppressed to meet the confidentiality requirements of the *Statistics Act*
- ^E use with caution
- F too unreliable to be published

Note on Cansim

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

® Registered Trade Mark of Statistics Canada.

Revision

Unless otherwise stated, price indexes in this publication are subject to revision for the most recent six months shown. Any revisions beyond these limits are so indicated.

This publication was prepared under the direction of:

- **George Beelen**, Director, Prices Division
- **Fred Barzyk**, Chief, Producer Prices Section

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.

Highlights

Prices for manufactured goods at the factory gate were up in March, as higher prices were registered for gasoline and fuel oils. Raw materials prices also increased in March, the result of higher prices for non-ferrous metals.

Prices charged by manufacturers, as measured by the Industrial Product Price Index (IPPI), were up 0.8% from February to March. Higher prices for petroleum products, primary metal products and motor vehicles and other transport equipment were the major contributors to this monthly increase.

Prices for manufactured goods increase

The 12-month change in the IPPI was 1.1%, up from February's year-over-year increase of 0.7%. Higher prices for petroleum products, primary metal products and chemical products were the major contributors to this annual increase.

The Raw Materials Price Index (RMPI) was up 0.8% from February to March, following a decrease of 3.2% in February and due primarily to higher prices for non-ferrous metals.

Compared to March of last year, raw materials cost factories 4.9% more, the lowest year-over-year change since March 2004. In March, the IPPI (1997=100) stood at 112.3 up from February's revised level of 111.4. The RMPI (1997=100) reached 151.6, up from a revised level of 150.4 in February.

IPPI: Prices for petroleum products are up

On a month-over-month basis, manufacturers' prices were up 0.8%, mainly due to higher prices for gasoline and fuel oils, primary metal products and motor vehicles.

Petroleum and coal products prices increased 5.4% compared to February. If petroleum and coal product prices had been excluded, the IPPI would have increased 0.5% rather than 0.8%. Prices for primary metal products rose 1.5% as prices for copper, zinc, aluminum and silver products increased due to continuing high demand.

Prices for motor vehicles and other transport equipment were up 0.4% from February, due primarily to a weaker Canadian dollar.

Prices for pulp and paper products, machinery and equipment as well as meat, fish and dairy products also recorded increases in March.

However, lumber and other wood products decreased 0.3% from February to March. Lower prices were observed for softwood lumber, particleboard as well as softwood plywood excluding Douglas fir.

IPPI: Petroleum and primary metal products are the major factors in the 12-month change

On a 12-month basis, the IPPI increased 1.1% in March, up from the year-over-year change of 0.7% observed in February. Prices for petroleum and coal products rose 11.7% from March 2005, down from February's increase of 14.5%. If petroleum and coal product prices had been excluded, the IPPI would have increased 0.2%, rather than 1.1% from a year ago.

Prices for primary metal products were up 4.6% compared to a year ago. Higher prices were observed for copper, aluminum and zinc products. Chemical products increased 4.0%, due to higher prices for synthetic resins and inorganic industrial chemicals.

Prices were also higher than one year ago for rubber, leather and plastic fabricated products, tobacco products, fruit, vegetable and feed products, non-metallic mineral products and furniture and fixtures.

On the other hand, lumber and other wood products declined 8.4% from March 2005 to March 2006, as year-over-year price decreases were recorded for softwood lumber (-10.9%), particleboard (-22.4%) and softwood plywood excluding Douglas fir (-18.3%).

Motor vehicles and other transport equipment prices were down 3.4% from a year ago, mainly as a result of a stronger Canadian dollar.

Prices for pulp and paper products, meat, fish and dairy products as well as metal fabricated products were also down from a year ago.

RMPI: Non-ferrous metals push up raw materials prices

On a monthly basis, raw material prices rose 0.8% in March, following a decrease of 3.2% in February. Non-ferrous metals were the major contributors to this monthly increase as prices

Raw materials prices are up

rose 4.0%. Prices for zinc concentrates, radio-active concentrates, copper concentrates, silver and gold were up due to strong demand and tight supply.

Mineral fuels increased 0.2% compared to February. Higher prices for crude oil (+0.6%) were partly offset by lower prices for natural gas (-1.9%).

Prices for animal and animal products rose 0.8% as increases were registered for unprocessed whole milk and hogs for slaughter.

On a 12-month basis, the price of raw materials rose 4.9% in March, a significant decrease from the 10.7% year-over-year increase observed in February. This was the lowest 12-month change since March 2004.

Mineral fuels were up 3.8% with natural gas prices rising 25.3%. Crude oil prices were up only 0.3% from a year ago, its lowest increase in two years. If mineral fuels had been excluded, the RMPI would have increased 6.2% instead of rising 4.9%.

Prices for non-ferrous metals rose 31.4%, mainly because of higher prices for radio-active concentrates, zinc concentrates, copper concentrates, gold, silver and lead. Prices for non-metallic minerals were also up 6.9% from a year ago.

On the other hand, prices for wood products, animal and animal products as well as ferrous materials were down compared to March 2005.

Impact of the exchange rate

Between February and March, the value of the Canadian dollar against the US dollar was down 0.7%. As a result, the total IPPI excluding the effect of the exchange rate would have risen 0.6% instead of its actual increase of 0.8%.

On a 12-month basis, the value of the Canadian dollar rose 5.1% against the US dollar. If the impact of the exchange rate had been excluded, producer prices would have risen 2.4% between March 2005 and March 2006, rather than their actual increase of 1.1%.

Higher prices for intermediate goods

Prices for intermediate goods increased 0.8% from February. Higher prices for petroleum products, primary metal products, pulp and paper products, motor vehicles, meat, fish and dairy products as well as fruit, vegetable and feed products were the major contributors to the increase.

Producers of intermediate goods received 1.8% more for their goods in March than the same month a year earlier. Higher prices were registered for petroleum products, primary metal products, chemical products, rubber, leather and plastic fabricated products and non-metallic mineral products.

These increases were partly offset by lower prices for lumber products, motor vehicles, meat, fish and dairy products, pulp and paper products, and metal fabricated products.

Finished goods prices increase

On a monthly basis, prices for finished goods were up 0.9% from February. Higher prices for petroleum products, motor vehicles, machinery and equipment and meat, fish and dairy products were the major contributors to this monthly rise.

Compared with March 2005, prices for finished goods edged up 0.1%. Higher prices for petroleum products, tobacco products, fruit, vegetable and feed products, furniture and fixtures, chemical products, and rubber, leather and plastic fabricated products were offset by lower prices for motor vehicles and lumber products.

Note to readers

The **Industrial Product Price Index (IPPI)** reflects the prices that producers in Canada receive as the goods leave the plant gate. It does not reflect what the consumer pays. Unlike the Consumer Price Index, the IPPI excludes indirect taxes and all the costs that occur between the time a good leaves the plant and the time the final user takes possession of it, including the transportation, wholesale, and retail costs.

Canadian producers export many goods. They often quote their prices in foreign currencies, particularly for motor vehicles, pulp, paper, and wood products. Therefore, a rise or fall in the value of the Canadian dollar against its U.S. counterpart affects the IPPI.

The **Raw Materials Price Index (RMPI)** reflects the prices paid by Canadian manufacturers for key raw materials. Many of these prices are set in a world market. Unlike the IPPI, the RMPI includes goods not produced in Canada.

v1576232	99 99	2005	134.9	139.3	144.7	146.9	160.8	165.8	168.7	169.2	171.3	182.4	185.9	194.3	163.7
		2006	201.6	205.8	213.8

Note: Indexes for the most recent six months shown are subject to revision.

- The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM series number (v nnnnnn) and a numeric descriptor.
The numeric descriptor is of the order ss-mm-nn-pppp-rr where
ss indicates the S-level commodity code (from 9 to 28)
mm indicates the M-level commodity code (from 14 to 43, 45 to 69)
nn indicates the M-level commodity split, or 91, which indicates a special aggregation or 99, which indicates special details
pppp indicates the PCGA code (except for some special aggregations which include several PCGAs)
rr indicates a split of a PCGA.

Table 3

Industrial Product Price Indexes, by Industry and Industry Groups (1997=100)

		Jan.	Feb.	March	April	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Annual average

Note: Indexes for the most recent six months shown are subject to revision.

1. The aggregation of indexes by commodity or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.
2. The numeric code to the right of the CANSIM series number on the last line of each series is the 1997 North American Industry Classification System (NAICS) code.

Explanation of methods used and additional sources for industrial price indexes

Industrial Product Price Indexes (1997=100)

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 980 Principal Commodity Group Aggregates (PCGA) outputs as defined in the 1997 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures. Such indexes are derived from prices reported for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about four weeks after the reference month in Statistics Canada's *The Daily* (Catalogue 11-001-XIE) following a pre-announced schedule of release dates. Simultaneously, all the indexes become available on CANSIM in Tables 329-0038 to 329-0049 or by request.

Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

Price Surveys

About 9,000 prices are collected monthly from about 3,000 producers for goods sold, which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure. Important producers are «must take» respondents. A random selection is taken from the smaller producers. These samples are redrawn on a regular cycle as dictated by changes in the market. A directly surveyed elemental index is usually supported by 12 to 15 price quotes. An index may be derived from as few as 8 quotes or as many as 30 quotes.

About 700 of the 980 PCGAs in the manufacturing sector are accommodated by direct survey and these account for about 90% of the value of manufacturing output in 1997.

The price movement for the other PCGAs is estimated indirectly from either directly priced PCGAs or through borrowing price movement from other price series.

Weight Base

Commodity and industry weights are taken from the «Make» matrix of the 1997 Input/Output table which, in turn, is derived from 1997 values reported for the Survey of Manufacturers and edited to conform to the 1997 North American Industry Classification System. However, each December, company/product weights within a commodity index can be changed in order to reflect important changes in production patterns.

Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically, as required, in December of each year. Weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where w^i are the values of the output of each commodity:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in the base period;

$P_{t/o}^i$ is the price index for element i , meaning its price change from the base period to time t ;

\sum_i indicates summation over all elements i in the defined aggregate.

Historical Data

Historical series on the 1997 base for the Industry Price Indexes are available on CANSIM. The historical series are computed for the industry indexes classified under the 1997 North American Industry Classification System (NAICS) and for commodity indexes classified under the Principal Commodity Group Aggregates (PCGA) classification. The historical series were obtained by linking together movements from the 1997-based Industrial Product Price Indexes (IPPI) series and the corresponding 1992-based Industrial Product Price Indexes (IPPI) series, using 1997 as the linking period. A set of concordance tables between both sets of IPPI series are available to the public.

Reference Documents

62-558-XPB Industry Price Indexes, 1986=100: Users' Guide, \$40.00.

This publication describes briefly the economic content of the series and presents a short description of different aggregations produced. In the tables the weighting patterns (1986) for both commodities and commodity groupings are shown. Descriptions of the characteristics of the elemental indexes are provided. Comments on index use are also provided.

62-556-XPB Industrial Product Price Indexes, 1981=100, Concepts and Methods, \$25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described, as are index calculation and aggregation procedures. A glossary of terms is also provided.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613) 951-9606, facsimile (613) 951-1539, Internet address infounit@statcan.ca.

Raw materials price indexes (1997 = 100)

The Raw Materials Price Indexes (RMPI) measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example, wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1997 time base, are published monthly in Statistics Canada's The Daily approximately four weeks after the end of the reference month. They are also available at that time on CANSIM in Table 330-0006.

Historical Data

The new historical series were obtained by linking together movements from the 1997-based Raw Material Price Indexes (RMPI) series and the corresponding 1992-based Raw Material Price Indexes (RMPI) series, using the year 1997 as the linking period. An explanatory note on the methods used to compute the historical series, as well as a set of concordance tables between both sets of RMPI series are available to the public.

Coverage

The index covers purchases of imported and domestically produced goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes net paid and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not

available, prices are taken for a similar commodity at the next stage of processing as occurred for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

Weight Base

Weights were derived from the 1997 Input/Output tables which provide values at purchasers' prices of commodities purchased as intermediate inputs.

Within individual commodity indexes, the prices are weighted according to their market share in a recent year. In a few instances, where data are not available, the price quotations are equally weighted.

Formula

Indexes for aggregates of individual raw materials are calculated according to the following formula:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in 1997;

$P_{t/o}^i$ is the price index for element i , meaning its price change from the base period o to time t ;

\sum_i indicates summation over all elements i in the defined aggregate.

Reference Document

See reference document in IPPI.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario, K1A 0T6, telephone (613) 951-9606, facsimile (613) 951-1539, Internet address infounit@statcan.ca.

Electric Power Selling Price Indexes, Non-residential, (1997=100)

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales; for bills less than 5000 kW and for sales of 5000 kW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1997 as a time reference base and the weights used are 1992 company revenues from sales of electricity, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described in the explanation of methods used for the Industrial Product Price Indexes, 1997=100. The indexes are available on CANSIM in Table 329-0050. Indexes for the current year and the previous year are subject to revision.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613) 951-9606, facsimile (613) 951-1539, Internet address infounit@statcan.ca.

Statistics Canada
Statistique Canada

Canada

*Get the
complete
picture with
the 1996
Census of
Agriculture*

Whatever your interest in agriculture, the Census of Agriculture is your *Key Information Source* at Canada, provincial and small-area levels.

Census of Agriculture products and services are on track with your needs.

- Use **CUSTOM SERVICES** — such as custom tabulations and thematic maps — to gain unique insight *and* the competitive advantage. For information, call toll-free 1-800-465-1991 or (613) 951-2889.
- For speed and flexibility, key into the Census of Agriculture **CD-ROM** for all farm and farm operator variables.
- Look to **PUBLICATIONS** for easy-to-read tables and graphics plus straightforward analysis. The series includes *Historical Overview of Canadian Agriculture*, *Agricultural Profiles (Canada and provinces)*, *Profile of Canadian Farm Operators* and *Canadian Agriculture at a Glance*.

To order the CD-ROM, call toll-free 1-800-465-1991 or (613) 951-2889.

To order publications, write to Statistics Canada, Dissemination Division, Circulation Management, 120 Parkdale Ave., Ottawa, Ontario, K1A 0T6, or contact the nearest Statistics Canada Reference Centre listed in this publication. If more convenient, fax your publications order to (613) 951-1584 or call toll-free 1-800-267-6677 and use your VISA, MasterCard or American Express. Via Internet: order@statcan.ca

Canadian Business Patterns

Profiling Corporate Canada... one community at a time

In the new economy where business is fueled by information, you need accurate, timely and comprehensive data to capture the complete perspective.

Nothing helps you leverage the power of information to profile Canada's business community faster, simpler or more effectively than the *Canadian Business Patterns (CBP)*.

This unique research tool provides detailed and reliable counts of business establishments by:

- nine employment size ranges
- geography groupings by province, metropolitan areas, census agglomerations, census divisions and census subdivisions
- and various levels of industry classification (SIC and NAICS).

Make better decisions — faster!

Use the *Canadian Business Patterns* to:

- study economic activity
- conduct administrative planning
- benchmark statistical surveys
- analyse economic change
- analyse market potential
- and much, much more!

Explore the world of business on disc

The CD-ROM *Canadian Business Patterns* provides you with the speed and reliability you need, combined with the freedom of flexibility you demand. Use the *CBP* to copy text right into your documents and databases, view data on a customized basis, and search, locate and print exactly what you are looking for.

CD-ROM *Semi-annual* (Cat. No. 61F0040XDB): starting from \$150

CALL 1 888 553-9993 • FAX (613) 951-6274

MAIL to Statistics Canada, Business Register Division, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6, Canada.

E-MAIL order@statcan.ca

EXCLUSIVE OFFER! Buy 2 and get 40% off!

Purchase the *Canadian Business Patterns* for two reference periods and get 40% off the price of the second unit!

Take advantage of this substantial saving — Order today!

Design your data solutions to your specifications

Statistics Canada offers customized extractions from the *CBP* with your choice of geography, industry or one or more of the standard employment size ranges. We can also provide custom tabulations such as revenue-related data, non-standard geographies (e.g. enumeration areas) or your own employment size ranges starting at \$150. For more information, contact your nearest Statistics Canada regional office at 1 800 263-1136.

In Canada, please add either GST and applicable PST or HST. Shipping charges: no shipping charges for delivery in Canada. For shipments to the United States, please add \$6 per item ordered. For shipments to other countries, please add \$10 per item ordered. (Federal government clients must indicate their IS Organization Code and IS Reference Code on all orders.)

Note of Appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Symbols

The following standard symbols are used in Statistics Canada publications:

- . not available for any reference period
- .. not available for a specific reference period
- ... not applicable
- 0 true zero or a value rounded to zero
- 0^s value rounded to 0 (zero) where there is a meaningful distinction between true zero and the value that was rounded
- ^P preliminary
- ^r revised
- x suppressed to meet the confidentiality requirements of the *Statistics Act*
- ^E use with caution
- F too unreliable to be published

Note on Cansim

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

® Registered Trade Mark of Statistics Canada.

Revision

Unless otherwise stated, price indexes in this publication are subject to revision for the most recent six months shown. Any revisions beyond these limits are so indicated.

This publication was prepared under the direction of:

- **George Beelen**, Director, Prices Division
- **Fred Barzyk**, Chief, Producer Prices Section

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.

Highlights

Monthly prices for manufactured goods at the factory gate were up in April, as prices for petroleum and primary metal products increased. Raw materials prices also increased in April, the result of higher prices for crude oil and non-ferrous metals.

Prices charged by manufacturers, as measured by the Industrial Product Price Index (IPPI), were up 1.3% from March to April. Higher prices for petroleum products and primary metal products were the major contributors to this monthly increase.

Prices for manufactured goods are up again

The 12-month change in the IPPI was 2.2%, up from March's year-over-year increase of 1.2%. Higher prices for petroleum products, primary metal products and chemical products were the major contributors to this annual increase.

The Raw Materials Price Index (RMPI) was up 5.7% from March to April, following an increase of 0.9% in March and due primarily to higher prices for crude oil and non-ferrous metals.

Compared to April of last year, raw materials cost factories 12.9% more, up significantly from the year-over-year change of 5.3% in March.

In April, the IPPI (1997=100) stood at 113.9, up from March's revised level of 112.4. The RMPI (1997=100) reached 160.9, up from a revised level of 152.2 in March.

IPPI: Prices for petroleum products and primary metals are up

On a month-over-month basis, manufacturers' prices were up 1.3%, mainly due to higher prices for gasoline and fuel oil as well as primary metal products.

Petroleum and coal products prices increased 9.6% compared to March. If petroleum and coal product prices had been excluded, the IPPI would have increased 0.5% rather than 1.3%.

Prices for primary metal products rose 6.4%, the largest increase observed since the 5.6% rise in February 2004. Strong demand, low inventories and concerns about supply pushed up prices for primary copper products (+25.0%), refined zinc products (+30.7%), primary nickel products (+20.0%), silver products (+18.8%) as well as refined gold products (+7.4%).

Prices for pulp and paper products, non-metallic mineral products as well as metal fabricated products also increased in April but to a much lesser degree.

However, prices for motor vehicles and other transport equipment were down 0.6% from March, due primarily to a stronger Canadian dollar. Lumber and other wood products decreased 1.0% from March to April, mainly due to an ample supply of softwood lumber. Prices for chemical products declined 1.1% as lower prices were recorded for synthetic resins.

Prices for meat, fish and dairy products, fruit, vegetable and feed products as well as machinery and equipment also declined in April.

IPPI: Petroleum and primary metal products continue to be the major factors in the 12-month change

On a 12-month basis, the IPPI was up 2.2% in April, an increase from the year-over-year change of 1.2% in March.

Prices for petroleum and coal products rose 19.5% from April 2005, up from March's increase of 11.8%. If petroleum and coal product prices had been excluded, the IPPI would have increased 0.5%, rather than 2.2% from a year ago.

Prices for primary metal products were up 12.2% compared to a year ago. Significantly high prices on a year-over-year basis were observed for copper products (+65.0%) and refined zinc products (+124.5%). Prices for aluminum (+12.4%), silver (+56.6%) and gold (+31.0%) products also contributed to the annual increase.

Chemical products increased 2.3%, due to higher prices for inorganic industrial chemicals. Prices were also higher than one year ago for rubber, leather and plastic fabricated products, non-metallic mineral products, fruit, vegetable and feed products, tobacco products and furniture and fixtures.

On the other hand, lumber and other wood products declined 6.2% from April 2005 to April 2006, as year-over-year decreases were recorded for softwood lumber (-9.4%), particleboard (-9.9%) and pulpwood chips (-8.0%).

Motor vehicles and other transport equipment prices were down 5.1% from a year ago, mainly as a result of a stronger Canadian dollar.

Prices for pulp and paper products, meat, fish and dairy products as well as electrical and communication products were also down from a year ago.

Raw materials prices are up again

RMPI: Crude oil and non-ferrous metals push up raw materials prices

On a monthly basis, raw materials prices rose 5.7% in April, following an increase of 0.9% in March. Mineral fuels increased 6.8% compared to March. Prices for crude oil were up by 10.4%, mainly due to increased concerns over supply.

Non-ferrous metals prices rose 15.6%, the largest monthly increase since the peak of 9.6% reached in February 2004. High demand, especially from China, and limited supply pushed up prices for zinc (+31.2%), copper (+25.4%), nickel (+19.9%), silver (+18.8%) and gold (+7.4%).

Prices for ferrous materials, vegetable products and wood products also increased in April but to a lesser degree.

Prices for animal and animal products fell 2.3% as decreases were registered for unprocessed whole milk, hogs for slaughter and cattle for slaughter.

On a 12-month basis, the price of raw materials rose 12.9% in April, a significant increase from the 5.3% year-over-year gain in March.

Mineral fuels were up 12.4% with crude oil prices rising 12.9% and natural gas prices increasing 10.0% from a year ago. If mineral fuels had been excluded, the RMPI would have increased 13.5% instead of rising 12.9%.

Prices for non-ferrous metals rose 61.3%, mainly because of higher prices for zinc, radio-active concentrates, copper, gold and silver. Prices for vegetable products and non-metallic minerals were also up from a year ago.

On the other hand, prices for ferrous materials, wood products as well as animal and animal products were down compared to April 2005.

Impact of the exchange rate

Between March and April, the value of the Canadian dollar against the US dollar was up 1.2%. As a result, the total IPPI

excluding the effect of the exchange would have risen 1.7% instead of its actual increase of 1.3%.

On a 12-month basis, the value of the Canadian dollar rose 8.1% against the US dollar. If the impact of the exchange rate had been excluded, producer prices would have risen 4.3% between April 2005 and April 2006, rather than their actual increase of 2.2%.

Higher prices for intermediate goods

Prices for intermediate goods increased 1.6% from March. Higher prices for petroleum products, primary metal products, pulp and paper products as well as beverages were the major contributors to this monthly rise.

These increases were partly offset by lower prices for chemical products, lumber products, meat, fish and dairy products and fruit, vegetable and feed products.

Producers of intermediate goods received 3.5% more for their goods in April 2006 than in April 2005. Higher prices were registered for petroleum products, primary metal products, rubber, leather and plastic fabricated products, chemical products and non-metallic mineral products.

These increases were partly offset by lower prices for lumber products, pulp and paper products, motor vehicles, meat, fish and dairy products and fruit, vegetable and feed products.

Finished goods prices increase

On a monthly basis, prices for finished goods were up 0.6% from March. Higher prices for petroleum products, pulp and paper products and metal fabricated products were the major contributors to this monthly rise.

These increases were partly offset by lower prices for motor vehicles and electrical and communication products.

Compared with April 2005, prices for finished goods remained unchanged. Higher prices for petroleum products, tobacco products, chemical products, fruit, vegetable and feed products, furniture and fixtures and rubber, leather and plastic fabricated products were offset by lower prices for motor vehicles, electrical and communication products, lumber products, machinery and equipment and meat, fish and dairy products.

Note to readers

The **Industrial Product Price Index (IPPI)** reflects the prices that producers in Canada receive as the goods leave the plant gate. It does not reflect what the consumer pays. Unlike the Consumer Price Index, the IPPI excludes indirect taxes and all the costs that occur between the time a good leaves the plant and the time the final user takes possession of it, including the transportation, wholesale, and retail costs.

Canadian producers export many goods. They often quote their prices in foreign currencies, particularly for motor vehicles, pulp, paper, and wood products. Therefore, a rise or fall in the value of the Canadian dollar against its US counterpart affects the IPPI.

The **Raw Materials Price Index (RMPI)** reflects the prices paid by Canadian manufacturers for key raw materials. Many of these prices are set in a world market. Unlike the IPPI, the RMPI includes goods not produced in Canada.

Text Table I

Industrial Product Price Indexes, by Stage of Processing (1997=100), Percentage Change From the Same Month a Year Earlier

Note: Indexes for the most recent six months shown are subject to revision.

- The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM series number (v nnnnnnn) and a numeric descriptor.
The numeric descriptor is of the order ss-mm-nn-pppp-rr where
ss indicates the S-level commodity code (from 9 to 28)
mm indicates the M-level commodity code (from 14 to 43, 45 to 69)
nn indicates the M-level commodity split, or 91, which indicates a special aggregation or 99, which indicates special details
pppp indicates the PCGA code (except for some special aggregations which include several PCGAs)
rr indicates a split of a PCGA.

Table 3

Industrial Product Price Indexes, by Industry and Industry Groups (1997=100)

		Jan.	Feb.	March	April	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Annual average
ALL MANUFACTURING														
v3822562	2005 2006	109.3 112.0	110.6 111.5	111.1 112.4	111.5 113.9	111.4 ..	111.3 ..	110.8 ..	111.2 ..	111.9 ..	112.1 ..	111.4 ..	111.2 ..	111.2
TOTAL EXCLUDING FOOD AND BEVERAGE MANUFACTURING														
v3825177	2005 2006	109.7 112.8	111.2 112.2	111.6 113.2	112.2 114.9	112.0 ..	112.0 ..	111.4 ..	111.8 ..	112.7 ..	112.9 ..	112.1 ..	111.8 ..	111.8
FOOD AND BEVERAGE MANUFACTURING EXCLUDING ALCOHOLIC BEVERAGES														
v3825179	2005 2006	104.5 105.4	105.3 105.5	105.8 105.7	105.5 105.3	105.9 ..	105.0 ..	105.0 ..	105.3 ..	104.8 ..	104.9 ..	104.8 ..	105.4 ..	105.2
NON-FOOD (INCLUDING ALCOHOLIC BEVERAGES) MANUFACTURING														
v3825180	2005 2006	109.9 112.9	111.3 112.3	111.8 113.4	112.4 115.1	112.2 ..	112.2 ..	111.6 ..	112.0 ..	112.9 ..	113.1 ..	112.3 ..	112.0 ..	112.0
BASIC MANUFACTURING INDUSTRIES														
v3825181 321, 322, 327, 331	2005 2006	108.3 109.3	110.4 110.0	110.1 110.8	109.4 113.5	108.6 ..	107.8 ..	105.5 ..	104.9 ..	104.4 ..	105.2 ..	105.7 ..	107.0 ..	107.3
NON-FOOD (EXCLUDING BASIC MANUFACTURING INDUSTRIES) MANUFACTURING														
v3825182	2005 2006	110.3 114.0	111.4 112.9	112.2 114.1	113.2 115.4	113.2 ..	113.5 ..	113.6 ..	114.4 ..	115.8 ..	115.8 ..	114.5 ..	113.6 ..	113.5
PRIMARY METAL MANUFACTURING EXCLUDING PRECIOUS METALS														
v3825183	2005 2006	121.0 125.7	122.5 127.9	122.6 129.5	121.6 136.5	122.3 ..	120.7 ..	116.0 ..	116.8 ..	114.3 ..	116.1 ..	118.7 ..	122.0 ..	119.6
FOOD AND BEVERAGE MANUFACTURING														
v3825178 311, 3121	2005 2006	106.2 107.1	107.0 107.3	107.5 107.4	107.2 107.1	107.6 ..	106.7 ..	106.7 ..	107.1 ..	106.6 ..	106.7 ..	106.6 ..	107.1 ..	106.9
Food manufacturing														
v3822563 311	2005 2006	104.2 104.9	105.1 105.0	105.5 105.2	105.1 104.8	105.6 ..	104.7 ..	104.7 ..	105.0 ..	104.5 ..	104.5 ..	104.4 ..	105.0 ..	104.9
Animal food manufacturing														
v3822564 3111	2005 2006	86.0 88.9	85.9 87.4	87.0 87.3	86.8 87.0	86.6 ..	87.6 ..	88.3 ..	87.2 ..	86.0 ..	86.3 ..	86.6 ..	88.6 ..	86.9
Grain and oilseed milling														
v3822565 3112	2005 2006	93.7 95.3	94.1 94.2	96.9 95.3	96.7 94.2	97.1 ..	98.5 ..	99.2 ..	96.5 ..	95.4 ..	95.6 ..	94.7 ..	95.9 ..	96.2
Flour milling and malt manufacturing														
v3822566 31121	2005 2006	91.7 94.1	92.0 93.4	92.3 94.2	92.0 93.3	92.7 ..	92.3 ..	92.5 ..	92.1 ..	92.7 ..	93.1 ..	93.2 ..	93.6 ..	92.5
Starch and vegetable fat and oil manufacturing														
v3822567 31122	2005 2006	88.6 90.0	89.0 88.4	93.7 89.9	93.5 88.6	93.8 ..	96.6 ..	97.7 ..	93.2 ..	90.9 ..	91.1 ..	89.5 ..	91.4 ..	92.4
Breakfast cereal manufacturing														
v3822568 31123	2005 2006	112.9 114.0	113.6 113.8	113.7 114.0	113.6 113.9	113.5 ..	113.5 ..	113.5 ..	113.5 ..	113.6 ..	113.7 ..	113.8 ..	113.9 ..	113.6
Sugar manufacturing														
v3822570 31131	2005 2006	114.5 126.5	115.4 133.1	115.2 131.6	114.5 131.9	114.8 ..	115.5 ..	116.0 ..	116.5 ..	117.9 ..	120.0 ..	120.8 ..	124.6 ..	117.1
Confectionery product manufacturing														
v3822571 31132-31134	2005 2006	109.1 111.5	109.7 111.3	110.3 111.6	109.4 111.5	109.1 ..	109.2 ..	108.7 ..	108.5 ..	108.5 ..	108.2 ..	110.9 ..	111.2 ..	109.4
Fruit and vegetable preserving and specialty food manufacturing														
v3822572 3114	2005 2006	109.9 112.7	110.3 113.2	110.5 113.2	110.8 113.3	111.2 ..	111.2 ..	111.0 ..	111.1 ..	111.1 ..	112.0 ..	112.1 ..	112.1 ..	111.1
Dairy product manufacturing														
v3822575 3115	2005 2006	120.0 123.8	122.1 124.9	123.0 125.1	122.9 125.1	123.0 ..	123.1 ..	123.3 ..	123.6 ..	123.8 ..	123.8 ..	123.9 ..	123.8 ..	123.0
Meat product manufacturing														
v3822576 3116	2005 2006	100.5 96.9	101.7 97.1	100.9 97.0	99.6 96.5	101.1 ..	96.7 ..	95.7 ..	98.3 ..	97.4 ..	96.9 ..	96.4 ..	97.4 ..	98.6
Animal (except poultry) slaughtering														
v3822577 311611	2005 2006	101.4 96.3	103.0 96.3	101.9 96.5	100.0 95.6	102.6 ..	96.0 ..	94.6 ..	98.8 ..	96.8 ..	96.2 ..	95.5 ..	97.0 ..	98.7

Note: Indexes for the most recent six months shown are subject to revision.

Note: Indexes for the most recent six months shown are subject to revision.

1. The aggregation of indexes by commodity or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.
2. The numeric code to the right of the CANSIM series number on the last line of each series is the 1997 North American Industry Classification System (NAICS) code.

Explanation of methods used and additional sources for industrial price indexes

Industrial Product Price Indexes (1997=100)

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 980 Principal Commodity Group Aggregates (PCGA) outputs as defined in the 1997 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures. Such indexes are derived from prices reported for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about four weeks after the reference month in Statistics Canada's *The Daily* (Catalogue 11-001-XIE) following a pre-announced schedule of release dates. Simultaneously, all the indexes become available on CANSIM in Tables 329-0038 to 329-0049 or by request.

Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

Price Surveys

About 9,000 prices are collected monthly from about 3,000 producers for goods sold, which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure. Important producers are "must take" respondents. A random selection is taken from the smaller producers. These samples are redrawn on a regular cycle as dictated by changes in the market. A directly surveyed elemental index is usually supported by 12 to 15 price quotes. An index may be derived from as few as 8 quotes or as many as 30 quotes.

About 700 of the 980 PCGAs in the manufacturing sector are accommodated by direct survey and these account for about 90% of the value of manufacturing output in 1997.

The price movement for the other PCGAs is estimated indirectly from either directly priced PCGAs or through borrowing price movement from other price series.

Weight Base

Commodity and industry weights are taken from the «Make» matrix of the 1997 Input/Output table which, in turn, is derived from 1997 values reported for the Survey of Manufacturers and edited to conform to the 1997 North American Industry Classification System. However, each December, company/product weights within a commodity index can be changed in order to reflect important changes in production patterns.

Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically, as required, in December of each year. Weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where w^i are the values of the output of each commodity:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in the base period;

$P_{t/o}^i$ is the price index for element i , meaning its price change from the base period to time t ;

\sum_i indicates summation over all elements i in the defined aggregate.

Historical Data

Historical series on the 1997 base for the Industry Price Indexes are available on CANSIM. The historical series are computed for the industry indexes classified under the 1997 North American Industry Classification System (NAICS) and for commodity indexes classified under the Principal Commodity Group Aggregates (PCGA) classification. The historical series were obtained by linking together movements from the 1997-based Industrial Product Price Indexes (IPPI) series and the corresponding 1992-based Industrial Product Price Indexes (IPPI) series, using 1997 as the linking period. A set of concordance tables between both sets of IPPI series are available to the public.

Reference Documents

62-558-XPB Industry Price Indexes, 1986=100: Users' Guide, \$40.00.

This publication describes briefly the economic content of the series and presents a short description of different aggregations produced. In the tables the weighting patterns (1986) for both commodities and commodity groupings are shown. Descriptions of the characteristics of the elemental indexes are provided. Comments on index use are also provided.

62-556-XPB Industrial Product Price Indexes, 1981=100, Concepts and Methods, \$25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described, as are index calculation and aggregation procedures. A glossary of terms is also provided.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613) 951-9606, facsimile (613) 951-1539, Internet address infounit@statcan.ca.

Raw materials price indexes (1997 = 100)

The Raw Materials Price Indexes (RMPI) measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example, wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1997 time base, are published monthly in Statistics Canada's The Daily approximately four weeks after the end of the reference month. They are also available at that time on CANSIM in Table 330-0006.

Historical Data

The new historical series were obtained by linking together movements from the 1997-based Raw Material Price Indexes (RMPI) series and the corresponding 1992-based Raw Material Price Indexes (RMPI) series, using the year 1997 as the linking period. An explanatory note on the methods used to compute the historical series, as well as a set of concordance tables between both sets of RMPI series are available to the public.

Coverage

The index covers purchases of imported and domestically produced goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes net paid and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not

available, prices are taken for a similar commodity at the next stage of processing as occurred for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

Weight Base

Weights were derived from the 1997 Input/Output tables which provide values at purchasers' prices of commodities purchased as intermediate inputs.

Within individual commodity indexes, the prices are weighted according to their market share in a recent year. In a few instances, where data are not available, the price quotations are equally weighted.

Formula

Indexes for aggregates of individual raw materials are calculated according to the following formula:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in 1997;

$P_{t/o}^i$ is the price index for element i , meaning its price change from the base period o to time t ;

\sum_i indicates summation over all elements i in the defined aggregate.

Reference Document

See reference document in IPPI.

Electric Power Selling Price Indexes, Non-residential, (1997=100)

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales; for bills less than 5000 kW and for sales of 5000 kW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1997 as a time reference base and the weights used are 1992 company revenues from sales of electricity, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described in the explanation of methods used for the Industrial Product Price Indexes, 1997=100. The indexes are available on CANSIM in Table 329-0050. Indexes for the current year and the previous year are subject to revision.

Note of Appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Symbols

The following standard symbols are used in Statistics Canada publications:

- . not available for any reference period
- .. not available for a specific reference period
- ... not applicable
- 0 true zero or a value rounded to zero
- 0^s value rounded to 0 (zero) where there is a meaningful distinction between true zero and the value that was rounded
- ^P preliminary
- ^r revised
- x suppressed to meet the confidentiality requirements of the *Statistics Act*
- ^E use with caution
- F too unreliable to be published

Note on Cansim

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

Highlights

Raw materials prices rose sharply for the second consecutive month due to higher prices for crude oil and non-ferrous metals. Prices for manufactured goods at the factory gate edged up in May.

Prices charged by manufacturers, as measured by the Industrial Product Price Index (IPPI), were up 0.3% from April to May. Higher prices for primary metal products and petroleum products were the major contributors to this monthly increase.

Prices for manufactured goods increase

The 12-month change in the IPPI was 2.5%, up from April's year-over-year increase of 2.2%. Upward pressure came mainly from higher prices for petroleum products and primary metal products.

The Raw Materials Price Index (RMPI) was up 5.6% from April to May, following a 5.7% increase in April, due primarily to higher prices for crude oil and non-ferrous metals.

Compared to May of last year, raw materials cost factories 23.4% more, up significantly from the year-over-year change of 13.1% in April, and the largest year-over-year increase since October 2004.

The IPPI stood at 114.2 (1997=100) in May, up from April's level of 113.9. The RMPI reached 170.2 (1997=100), up from a revised level of 161.1 in April.

IPPI: Prices for primary metals continue to increase

On a month-over-month basis, manufacturers' prices were up 0.3%, mainly due to higher prices for primary metal products as well as petroleum products.

Prices for primary metal products continue their upward pressure with a 6.8% increase compared to April. Strong demand, low inventories and supply constraints pushed up prices for primary copper products (+30.2%), primary aluminum products (+10.2%), primary nickel products (+11.4%), refined zinc products (+8.4%) as well as refined gold products (+9.3%).

Petroleum and coal products prices increased by only 1.0% compared to April, a significant drop from the 9.6% increase observed in the previous month. If petroleum and coal product prices had been excluded, the IPPI would have increased 0.2% rather than 0.3%.

Prices for meat, fish and dairy products as well as metal fabricated products also increased in May but to a much lesser degree.

However, prices for motor vehicles and other transport equipment were down 2.0% from April, as the Canadian dollar continues to strengthen. Lumber and other wood products decreased 1.3% from April to May, mainly due to a decline in construction activity as well as an ample supply of softwood lumber.

Prices for chemical products, electrical and communication products, pulp and paper products as well as machinery and equipment also declined in May.

IPPI: Petroleum and primary metal products remain the major contributors to the 12-month change

On a 12-month basis, the IPPI was up 2.5% in May, a slight increase from the year-over-year change of 2.2% in April.

Prices for petroleum and coal products rose 25.3% from May 2005, up from April's increase of 19.5%. If petroleum and coal product prices had been excluded, the IPPI would have increased 0.4%, rather than 2.5% from a year ago.

Prices for primary metal products were up 19.9% compared to a year ago. Record high prices on a year-over-year basis were observed again for copper products (+115.2%) and refined zinc products (+146.4%). Prices for aluminum (+23.3%), silver (+61.9%) and gold (+43.2%) products also contributed to the annual increase.

Prices were also higher than one year ago for rubber, leather and plastic fabricated products, chemical products, non-metallic mineral products, tobacco products, fruit, vegetable and feed products and furniture and fixtures.

On the other hand, motor vehicles and other transport equipment prices were down 8.0% from a year ago, mainly as a result of a stronger Canadian dollar.

Lumber and other wood products declined 3.8% from May 2005 to May 2006, as year-over-year decreases were recorded for softwood lumber (-6.7%) and pulpwood chips (-6.8%).

Prices for pulp and paper products, meat, fish and dairy products, electrical and communication products as well as machinery and equipment were also down from a year ago.

Raw materials prices are up again

RMPI: Crude oil and non-ferrous metals push up raw materials prices

On a monthly basis, raw materials prices rose 5.6% in May, following a 5.7% increase in April. Mineral fuels increased 6.7% compared to April. Prices for crude oil were up by 7.8%, mainly due to continued concerns over supply. If mineral fuels had been excluded, the RMPI would have increased 4.5% instead of rising 5.6%.

Non-ferrous metals prices rose 11.3%, down from the 15.6% increase recorded in April. Strong demand, lower inventories and supply concerns pushed up prices for copper (+30.4%), zinc (+9.1%), radio-active concentrates (+4.9%), gold (+9.3%) and nickel (+11.4%).

Prices for animals and animal products, vegetable products and wood products also contributed to the monthly increase.

Prices for ferrous materials fell 0.8% as prices for iron ore decreased 3.0% from April.

On a 12-month basis, the price of raw materials rose 23.4% in May, a significant increase from the 13.1% year-over-year increase observed in April. This is the largest year-over-year increase since October 2004.

Mineral fuels were up 27.2% with crude oil prices rising 31.1% and natural gas prices increasing 9.0% from a year ago. If mineral fuels had been excluded, the RMPI would have increased 19.7% instead of rising 23.4%.

Prices for non-ferrous metals rose 76.7%, mainly because of higher prices for zinc, copper, radio-active concentrates, gold and silver. Prices for ferrous materials, vegetable products and non-metallic minerals were also up from a year ago.

On the other hand, prices for animals and animal products were down 0.3% compared to May 2005 as lower prices for hogs for slaughter were almost offset by higher prices for cattle for slaughter and unprocessed whole milk.

Impact of the exchange rate

Between April and May, the value of the Canadian dollar against the US dollar was up 3.1%. As a result, the total IPPI excluding the effect of the exchange would have risen 1.1% instead of its actual increase of 0.3%.

On a 12-month basis, the value of the Canadian dollar rose 13.2% against the US dollar. If the impact of the exchange rate had been excluded, producer prices would have risen 5.8% between May 2005 and May 2006, rather than their actual increase of 2.5%.

Prices for intermediate goods are up

Prices for intermediate goods increased 0.9% from April. Higher prices for primary metal products, petroleum products, meat, fish and dairy products as well as metal fabricated products were the major contributors to this monthly rise.

These increases were partly offset by lower prices for motor vehicles, lumber products, chemical products, pulp and paper products and machinery and equipment.

Producers of intermediate goods received 5.0% more for their goods in May 2006 than in May 2005. Higher prices were registered for petroleum products, primary metal products, rubber, leather and plastic fabricated products, non-metallic mineral products and chemical products.

These increases were partly offset by lower prices for motor vehicles, lumber products, pulp and paper products, meat, fish and dairy products and electrical and communication products.

Finished goods prices decrease

On a monthly basis, prices for finished goods were down 0.9% from April. Lower prices for motor vehicles, electrical and communication products, petroleum products, and machinery and equipment were the major contributors to this monthly decline.

These decreases were partly offset by higher prices for meat, fish and dairy products as well as pulp and paper products.

Compared with May 2005, prices for finished goods decreased 1.3%. Lower prices for motor vehicles, electrical and communication products, machinery and equipment and meat, fish and dairy products were partially offset by higher prices for petroleum products, tobacco products, fruit, vegetable and feed products, furniture and fixtures, chemical products and rubber, leather and plastic fabricated products.

Note to readers

The **Industrial Product Price Index (IPPI)** reflects the prices that producers in Canada receive as the goods leave the plant gate. It does not reflect what the consumer pays. Unlike the Consumer Price Index, the IPPI excludes indirect taxes and all the costs that occur between the time a good leaves the plant and the time the final user takes possession of it, including the transportation, wholesale, and retail costs.

Canadian producers export many goods. They often quote their prices in foreign currencies, particularly for motor vehicles, pulp, paper, and wood products. Therefore, a rise or fall in the value of the Canadian dollar against its US counterpart affects the IPPI.

The **Raw Materials Price Index (RMPI)** reflects the prices paid by Canadian manufacturers for key raw materials. Many of these prices are set in a world market. Unlike the IPPI, the RMPI includes goods not produced in Canada.

Table 2

Industrial Product Price Indexes, by Commodity and Commodity Aggregations (1997=100) - Continued

			Jan.	Feb.	March	April	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Annual average
Other steel wire and wire rope															
v1575376	21 52 03 4466	2005	127.0	126.9	127.0	127.0	126.9	126.9	126.7	126.6	126.6	126.7	126.8	126.7	126.8
		2006	132.6	132.5	132.5	132.4	132.4
Hardware, tool and cutlery															
v1575387	21 52 04	2005	111.7	111.7	112.1	112.3	112.5	113.3	113.1	112.7	112.4	112.3	112.5	112.3	112.4
		2006	112.3	112.1	112.2	112.1	112.0
Builders' hardware															
v1575388	21 52 04 4643	2005	122.7	122.4	123.3	122.7	122.3	125.6	124.2	121.2	119.3	118.0	119.4	118.5	121.6
		2006	118.9	119.3	118.9	118.7	119.7
Dies, moulds and cutting and forming tools															
v1575391	21 52 04 5244	2005	110.6	110.7	111.3	111.7	112.2	113.0	112.8	112.7	112.5	112.5	112.5	112.3	112.1
		2006	112.3	112.0	112.1	112.0	111.7
Edge tools and garden implements, hand															
v1575392	21 52 04 7513	2005	116.1	116.1	116.1	116.1	115.1	115.1	115.1	115.1	115.1	115.5	115.5	115.5	115.5
		2006	115.5	115.5	115.5	115.5	115.5
Heating equipment															
v1575394	21 52 05	2005	112.3	112.5	112.5	112.6	113.0	113.0	112.9	113.0	113.0	113.0	113.0	112.9	112.8
		2006	112.9	113.3	113.3	113.3	113.3
Heating boilers and parts															
v1575395	21 52 05 6511	2005	113.8	113.8	113.8	113.8	115.4	115.4	115.4	115.4	115.4	115.4	115.4	115.4	114.9
		2006	115.4	115.4	115.4	115.4	115.4
Warm air furnaces, all types															
v1575397	21 52 05 6513	2005	112.8	112.8	112.8	112.8	112.8	112.8	112.8	112.9	112.9	112.9	112.9	112.2	112.8
		2006	112.2	112.2	112.2	112.2	112.2
Parts for heating equipment															
v1575401	21 52 05 6526	2005	118.5	118.5	118.5	120.4	120.4	120.4	120.4	120.4	120.4	120.4	120.4	120.4	119.9
		2006	129.1	129.1	129.1	129.9	132.2
Plumbing fixtures and valves, metal															
v1575403	21 52 06	2005	125.9	127.2	127.4	128.2	128.3	128.4	128.2	128.3	128.5	131.4	131.5	131.4	128.7
		2006	131.7	134.0	134.1	137.4	141.1
Valves, iron and steel body															
v1575404	21 52 06 4671	2005	110.7	112.7	112.6	114.7	114.8	115.3	114.9	115.1	115.1	115.3	115.2	115.3	114.3
		2006	115.7	119.4	118.9	119.1	119.1
Valves, non-ferrous metal															
v1575405	21 52 06 4672	2005	107.2	107.3	110.9	111.1	111.3	107.1	107.0	106.9	107.6	107.6	107.7	108.1	108.3
		2006	108.1	114.9	119.8	120.0	119.8
Plumbing fixtures, metal or metal-enamelled															
v1575408	21 52 06 6711	2005	112.4	112.4	112.4	112.4	112.4	112.4	112.4	112.4	112.4	112.4	112.1	112.1	112.4
		2006	113.2	113.2	113.2	113.2	113.2
Plumbing fixtures and fittings, plastic															
v1575409	21 52 06 6714	2005	111.2	113.0	113.0	113.0	113.0	113.0	112.9	112.9	112.9	112.9	113.5	113.5	112.9
		2006	113.5	115.3	115.3	115.3	115.3
Other metal fabricated products not elsewhere specified															
v1575410	21 52 07	2005	119.6	120.0	122.2	122.4	122.6	122.4	122.1	122.1	121.8	121.9	122.1	122.0	121.8
		2006	122.9	123.0	125.0	125.5	125.2
Sheet metal shapes, sidings and fittings															
v1575423	21 52 91 0001	2005	132.9	130.7	130.4	127.8	125.8	124.2	125.0	124.8	123.4	124.0	124.2	124.3	126.5
		2006	122.5	123.5	123.8	123.5	124.8
Kitchen utensils															
v1575424	21 52 91 0002	2005	132.3	132.2	132.1	132.1	132.0	132.1	132.2	132.1	132.0	132.0	131.9	131.9	132.1
		2006	131.9	132.0	131.9	135.1	135.1
Wire and wire rope, of steel															
v1575425	21 52 91 0003	2005	142.6	140.8	139.2	137.2	135.3	137.8	135.0	135.4	134.0	133.5	134.1	134.2	136.6
		2006	134.9	136.0	135.1	134.2	134.1
Wire fencing, screening and netting															
v1575426	21 52 91 0004	2005	130.3	129.3	128.9	128.4	125.7	126.3	125.4	125.2	124.1	124.0	123.8	123.8	126.3
		2006	123.8	124.1	122.4	122.2	122.1
Bolts, nuts, screws, washers															
v1575427	21 52 91 0005	2005	119.1	120.3	120.1	120.2	120.7	120.7	124.4	123.6	121.3	121.3	120.3	120.2	121.0
		2006	119.5	119.6	119.6	119.5	119.4

Note: Indexes for the most recent six months shown are subject to revision.

- The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM series number (v nnnnnn) and a numeric descriptor. The numeric descriptor is of the order ss-mm-nn-pppp-rr where
ss indicates the S-level commodity code (from 9 to 28)
mm indicates the M-level commodity code (from 14 to 43, 45 to 69)
nn indicates the M-level commodity split, or 91, which indicates a special aggregation or 99, which indicates special details
pppp indicates the PCGA code (except for some special aggregations which include several PCGAs)
rr indicates a split of a PCGA.

Table 3
Industrial Product Price Indexes, by Industry and Industry Groups (1997=100)

		Jan.	Feb.	March	April	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Annual average
ALL MANUFACTURING

Note: Indexes for the most recent six months shown are subject to revision.

1. The aggregation of indexes by commodity or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.
2. The numeric code to the right of the CANSIM series number on the last line of each series is the 1997 North American Industry Classification System (NAICS) code.

Table 4

Industrial Product Price Indexes, by Stage of Processing (1997=100)

Explanation of methods used and additional sources for industrial price indexes

Industrial Product Price Indexes (1997=100)

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 980 Principal Commodity Group Aggregates (PCGA) outputs as defined in the 1997 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures. Such indexes are derived from prices reported for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about four weeks after the reference month in Statistics Canada's *The Daily* (Catalogue 11-001-XIE) following a pre-announced schedule of release dates. Simultaneously, all the indexes become available on CANSIM in Tables 329-0038 to 329-0049 or by request.

Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

Price Surveys

About 9,000 prices are collected monthly from about 3,000 producers for goods sold, which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure. Important producers are "must take" respondents. A random selection is taken from the smaller producers. These samples are redrawn on a regular cycle as dictated by changes in the market. A directly surveyed elemental index is usually supported by 12 to 15 price quotes. An index may be derived from as few as 8 quotes or as many as 30 quotes.

About 700 of the 980 PCGAs in the manufacturing sector are accommodated by direct survey and these account for about 90% of the value of manufacturing output in 1997.

The price movement for the other PCGAs is estimated indirectly from either directly priced PCGAs or through borrowing price movement from other price series.

Weight Base

Commodity and industry weights are taken from the «Make» matrix of the 1997 Input/Output table which, in turn, is derived from 1997 values reported for the Survey of Manufacturers and edited to conform to the 1997 North American Industry Classification System. However, each December, company/product weights within a commodity index can be changed in order to reflect important changes in production patterns.

Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically, as required, in December of each year. Weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where w^i are the values of the output of each commodity:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in the base period;

$P_{t/o}^i$ is the price index for element i , meaning its price change from the base period to time t ;

\sum_i indicates summation over all elements i in the defined aggregate.

Historical Data

Historical series on the 1997 base for the Industry Price Indexes are available on CANSIM. The historical series are computed for the industry indexes classified under the 1997 North American Industry Classification System (NAICS) and for commodity indexes classified under the Principal Commodity Group Aggregates (PCGA) classification. The historical series were obtained by linking together movements from the 1997-based Industrial Product Price Indexes (IPPI) series and the corresponding 1992-based Industrial Product Price Indexes (IPPI) series, using 1997 as the linking period. A set of concordance tables between both sets of IPPI series are available to the public.

Reference Documents

62-558-XPB Industry Price Indexes, 1986=100: Users' Guide, \$40.00.

This publication describes briefly the economic content of the series and presents a short description of different aggregations produced. In the tables the weighting patterns (1986) for both commodities and commodity groupings are shown. Descriptions of the characteristics of the elemental indexes are provided. Comments on index use are also provided.

62-556-XPB Industrial Product Price Indexes, 1981=100, Concepts and Methods, \$25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described, as are index calculation and aggregation procedures. A glossary of terms is also provided.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613) 951-9606, facsimile (613) 951-1539, Internet address prices-prix@statcan.ca.

Raw materials price indexes (1997 = 100)

The Raw Materials Price Indexes (RMPI) measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example, wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1997 time base, are published monthly in Statistics Canada's The Daily approximately four weeks after the end of the reference month. They are also available at that time on CANSIM in Table 330-0006.

Historical Data

The new historical series were obtained by linking together movements from the 1997-based Raw Material Price Indexes (RMPI) series and the corresponding 1992-based Raw Material Price Indexes (RMPI) series, using the year 1997 as the linking period. An explanatory note on the methods used to compute the historical series, as well as a set of concordance tables between both sets of RMPI series are available to the public.

Coverage

The index covers purchases of imported and domestically produced goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes net paid and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not

available, prices are taken for a similar commodity at the next stage of processing as occurred for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

Weight Base

Weights were derived from the 1997 Input/Output tables which provide values at purchasers' prices of commodities purchased as intermediate inputs.

Within individual commodity indexes, the prices are weighted according to their market share in a recent year. In a few instances, where data are not available, the price quotations are equally weighted.

Formula

Indexes for aggregates of individual raw materials are calculated according to the following formula:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in 1997;

$P_{t/o}^i$ is the price index for element i , meaning its price change from the base period o to time t ;

\sum_i indicates summation over all elements i in the defined aggregate.

Reference Document

See reference document in IPPI.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario, K1A 0T6, telephone (613) 951-9606, facsimile (613) 951-1539, Internet address prices-prix@statcan.ca.

Electric Power Selling Price Indexes, Non-residential, (1997=100)

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales; for bills less than 5000 kW and for sales of 5000 kW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1997 as a time reference base and the weights used are 1992 company revenues from sales of electricity, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described in the explanation of methods used for the Industrial Product Price Indexes, 1997=100. The indexes are available on CANSIM in Table 329-0050. Indexes for the current year and the previous year are subject to revision.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613) 951-9606, facsimile (613) 951-1539, Internet address prices-prix@statcan.ca.

MERCI DE VOTRE COMMANDE!

Looking for health information online?

Link up with Statistics Canada's *Guide to Health Statistics!*

The *Guide to Health Statistics* is a series of **online links** that lead you to health information published by Statistics Canada.

Let www.statcan.ca's *Guide to Health Statistics* be your passage to the world of health information. In the Guide you'll discover links to:

- ➔ vital statistics
- ➔ cancer statistics
- ➔ health determinants
- ➔ health status
- ➔ health care issues
- ➔ and much more. . .

Find the information you need now. Link up to a host of online products, documents and surveys like the National Population Health Survey. The *Guide to Health Statistics* allows you to search and locate exactly what you're looking for.

Save time. A few clicks and you'll be connected to health information from www.statcan.ca, your source for health facts and analysis.

Access anywhere, anytime. You get current detailed information quickly and efficiently thanks to continuous updates, regardless of location and time constraints.

Put the data to work. Copy text from online right into your documents and databases.

Expertise you can trust!

You can count on relevant dependable information with a unique focus on Canada-wide indicators from Statistics Canada. So, when you're on the lookout for first-rate health facts and analysis, allow the *Guide to Health Statistics* on www.statcan.ca to be your bridge to health information.

It's easy! Visit our site at www.statcan.ca, click on Canadian Statistics and then choose Health. Click on the *Guide to Health Statistics* banner and let your mouse lead the way.

Bookmark it!

Here are some of the handy links you'll find in the *Guide to Health Statistics*

Links to insightful analysis and data on:

➔ Cancer

Health Surveys

- ➔ Canadian Community Health Survey (CCHS)
- ➔ National Population Health Survey (NPHS)
- ➔ Smoking and Tobacco Use Surveys
- ➔ Health Care
- ➔ Therapeutic Abortions
- ➔ Vital Statistics

Sample links to related sites:

Health information? We've got connections!

WHAT IF there were a place that could save you and your business time and money by offering a consolidated area with the latest in Canadian statistics?

WHAT IF there were a place that offered accessible and reliable data on an assortment of current hot topics on Canadian social and economic themes?

WHAT IF there were a place where analysis experts that know your markets could provide you with advice and customized data at your fingertips?

WHAT IF there were such a place?

THERE IS SUCH A PLACE.

Accessing and ordering information

This product, catalogue no. 62-011-XIE, is available for free in electronic format. To obtain a single issue, visit our website at www.statcan.ca and select Our Products and Services.

This product, catalogue no. 62-011-XPE, is also available as a standard printed publication at a price of CAN\$24.00 per issue and CAN\$233.00 for a one-year subscription.

The following additional shipping charges apply for delivery outside Canada:

	Single issue	Annual subscription
United States	CAN\$6.00	CAN\$72.00
Other countries	CAN\$10.00	CAN\$120.00

All prices exclude sales taxes.

The printed version of this publication can be ordered by

- Phone (Canada and United States) 1 800 267-6677
- Fax (Canada and United States) 1 877 287-4369
- E-mail infostats@statcan.ca
- Mail Statistics Canada
Finance Division
R.H. Coats Bldg., 6th Floor
100 Tunney's Pasture Driveway
Ottawa (Ontario) K1A 0T6
- In person from authorised agents and bookstores.

When notifying us of a change in your address, please provide both old and new addresses.

Standards of service to the public

Statistics Canada is committed to serving its clients in a prompt, reliable and courteous manner and in the official language of their choice. To this end, the Agency has developed standards of service which its employees observe in serving its clients. To obtain a copy of these service standards, please contact Statistics Canada toll free at 1 800 263-1136. The service standards are also published on www.statcan.ca under About Statistics Canada > Providing services to Canadians.

Note of Appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Symbols

The following standard symbols are used in Statistics Canada publications:

- . not available for any reference period
- .. not available for a specific reference period
- ... not applicable
- 0 true zero or a value rounded to zero
- 0^s value rounded to 0 (zero) where there is a meaningful distinction between true zero and the value that was rounded
- P preliminary
- r revised
- x suppressed to meet the confidentiality requirements of the *Statistics Act*
- E use with caution
- F too unreliable to be published

Note on Cansim

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

® Registered Trade Mark of Statistics Canada.

Revision

Unless otherwise stated, price indexes in this publication are subject to revision for the most recent six months shown. Any revisions beyond these limits are so indicated.

This publication was prepared under the direction of:

- **George Beelen**, Director, Prices Division
- **Fred Barzyk**, Chief, Producer Prices Section

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.

Explanation of Methods Used and Additional Sources for Industrial Price Indexes	61

Highlights

Raw materials prices declined sharply in June due to lower prices for non-ferrous metals and crude oil. Prices for manufactured goods at the factory gate were down in June following three months of increases.

Prices charged by manufacturers, as measured by the Industrial Product Price Index (IPPI), were down 0.4% from May to June. Lower prices for primary metal products and lumber products were the major contributors to this monthly decrease.

Prices for manufactured goods decrease

The 12-month change in the IPPI was up 2.2%, down slightly from May's year-over-year increase of 2.5%. Upward pressure came mainly from higher prices for petroleum products and primary metal products.

Following a 5.8% increase in May, the Raw Materials Price Index (RMPI) was down 2.5% from May to June, due primarily to lower prices for non-ferrous metals and crude oil.

Compared to June of last year, raw materials cost factories 14.7% more, down significantly from the year-over-year change of 23.6% in May.

The IPPI (1997=100) stood at 113.7 in June, down from 114.2 in May. The RMPI (1997=100) reached 166.2, down from a revised level of 170.4 in May.

IPPI: Prices for primary metals and lumber products decline

On a month-over-month basis, manufacturers' prices were down 0.4%, mainly due to lower prices for primary metal products as well as lumber products.

Prices for primary metal products declined 5.3% compared to May, a sharp contrast to the 6.9% and 6.7% increases recorded in May and April. Lower prices were observed for primary copper products (-14.0%), primary aluminum products (-7.8%), primary nickel products (-6.5%), refined zinc products (-11.4%), silver products (-19.5%) as well as refined gold products (-14.1%).

Lumber and other wood products were down 1.5% from May to June, mainly due to a decline in demand as well as a slowdown in construction. Prices for fruit, vegetable and feed products also declined in June.

However, petroleum and coal products prices increased by only 0.6% compared to May, a slight drop from the 0.9% increase a month earlier. If petroleum and coal product prices had been excluded, the IPPI would have decreased 0.6% rather than 0.4%.

Prices for pulp and paper products, metal fabricated products, meat, fish and dairy products as well as rubber, leather and plastic fabricated products also increased in June.

IPPI: Petroleum and primary metal products remain the major contributors to the 12-month change

On a 12-month basis, the IPPI was up 2.2% in June, a slight decrease from the year-over-year change of 2.5% in May.

Prices for petroleum and coal products rose 20.1% from June 2005, down from May's increase of 25.4%. If petroleum and coal product prices had been excluded, the IPPI would have increased 0.3%, rather than 2.2% from a year ago.

Prices for primary metal products were up 15.5% compared to a year ago. Higher prices on a year-over-year basis were observed for copper products (+75.8%), refined zinc products (+115.1%), aluminum products (+19.7%), silver products (+26.3%) and gold products (+21.6%).

Prices were also higher than one year ago for rubber, leather and plastic fabricated products, chemical products, non-metallic mineral products, tobacco products, metal fabricated products and furniture and fixtures.

On the other hand, motor vehicles and other transport equipment prices were down 7.0% from a year ago, mainly as a result of a stronger Canadian dollar.

Lumber and other wood products declined 5.4% from June 2005 to June 2006, as year-over-year decreases were recorded for softwood lumber (-8.4%), particleboard (-12.9%) and pulpwood chips (-3.9%).

Prices for electrical and communication products as well as machinery and equipment were also down from a year ago.

RMPI: Non-ferrous metals and crude oil push down raw materials prices

On a monthly basis, raw materials prices fell 2.5% in June, following increases of 5.8% in May and 5.7% in April.

Raw materials prices decline

Non-ferrous metals prices declined 10.9%, a significant drop from the increases of 15.6% in April and 11.3% in May. Lower demand pushed down prices for zinc (-11.3%), copper (-14.0%), lead (-20.8%), gold (-14.1%) and silver (-19.5%).

Mineral fuels decreased 1.2% compared to May. Prices for crude oil were down by 1.3%, mainly due to higher inventories and ample supply. If mineral fuels had been excluded, the RMPI would have decreased 3.8% instead of 2.5%.

Prices for wood products and non-metallic minerals also contributed to the monthly decrease but to a much lesser degree.

On the other hand, prices for animal and animal products, ferrous materials and vegetable products increased from May to June.

On a 12-month basis, the price of raw materials rose 14.7% in June, a significant drop from the 23.6% year-over-year increase in May.

Mineral fuels were up 13.5% with crude oil prices rising 14.5%. If mineral fuels had been excluded, the RMPI would have increased 16.1% instead of rising 14.7%.

Prices for non-ferrous metals rose 54.7%, mainly because of higher prices for zinc, copper, radio-active concentrates, gold and silver. Prices for ferrous materials, animal and animal products, non-metallic minerals and vegetable products were also up from a year ago.

Impact of the exchange rate

Between May and June, the value of the Canadian dollar against the US dollar was down 0.4%. As a result, the total IPPI excluding the effect of the exchange would have fallen 0.5% instead of its actual decrease of 0.4%.

On a 12-month basis, the value of the Canadian dollar rose 11.4% against the US dollar. If the impact of the exchange rate had been excluded, producer prices would have risen 5.0% between June 2005 and June 2006, rather than their actual increase of 2.2%.

Prices for intermediate goods are down

Prices for intermediate goods decreased 0.8% from May. Lower prices for primary metal products, lumber products, fruit, vegetable and feed products as well as chemical products were the major contributors to this monthly drop.

These decreases were partly offset by higher prices for pulp and paper products, petroleum products, meat, fish and dairy products, metal fabricated products and rubber, leather and plastic fabricated products.

Producers of intermediate goods received 4.2% more for their goods in June 2006 than in June 2005. Higher prices were registered for petroleum products, primary metal products, rubber, leather and plastic fabricated products, non-metallic mineral products, chemical products and metal fabricated products.

These increases were partly offset by lower prices for lumber products, motor vehicles, pulp and paper products, fruit, vegetable and feed products and electrical and communication products.

Finished goods prices unchanged in June

On a monthly basis, prices for finished goods were unchanged from May. Higher prices for motor vehicles, electrical and communication products and machinery and equipment were offset by lower prices for lumber products, pulp and paper products, non-metallic mineral products as well as chemical products.

Compared with June 2005, prices for finished goods decreased 1.0%. Lower prices for motor vehicles, electrical and communication products, machinery and equipment and lumber products were partially offset by higher prices for petroleum products, tobacco products, fruit, vegetable and feed products, meat, fish and dairy products, furniture and fixtures and rubber, leather and plastic fabricated products.

Note to readers

The **Industrial Product Price Index (IPPI)** reflects the prices that producers in Canada receive as the goods leave the plant gate. It does not reflect what the consumer pays. Unlike the Consumer Price Index, the IPPI excludes indirect taxes and all the costs that occur between the time a good leaves the plant and the time the final user takes possession of it, including the transportation, wholesale, and retail costs.

Canadian producers export many goods. They often quote their prices in foreign currencies, particularly for motor vehicles, pulp, paper, and wood products. Therefore, a rise or fall in the value of the Canadian dollar against its US counterpart affects the IPPI.

The **Raw Materials Price Index (RMPI)** reflects the prices paid by Canadian manufacturers for key raw materials. Many of these prices are set in a world market. Unlike the IPPI, the RMPI includes goods not produced in Canada.

Table 2
Industrial Product Price Indexes, by Commodity and Commodity Aggregations (1997=100) - Continued

		Jan.	Feb.	March	April	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Annual average
Nickel products														
v1575294	20 48	2005 185.8	196.0	201.9	202.0	229.2	212.5	183.4	192.3	168.3	149.6	145.3	161.6	185.7
		2006 175.2	179.3	176.3	211.5	235.7	220.4
Other non-ferrous metal products														
v1575299	20 49	2005 103.1	107.6	108.6	106.9	105.8	106.5	101.5	103.7	103.9	108.3	111.2	117.2	107.0
		2006 126.0	127.3	133.9	154.9	165.2	145.4
Primary refined non-ferrous metals														
v1575300	20 49 01	2005 102.4	106.2	107.7	105.0	103.6	104.0	99.0	102.5	103.2	107.3	111.0	117.0	105.7
		2006 127.1	128.3	135.1	157.3	166.7	147.1
Refined zinc including secondary														
v1575302	20 49 01 2560	2005 80.8	86.7	92.7	83.2	82.2	83.4	77.4	83.5	85.1	93.0	102.2	108.5	88.2
		2006 127.3	131.5	142.9	186.8	202.5	179.4
Gold and gold alloys in primary forms														
v1575304	20 49 01 2563	2005 113.7	115.4	116.7	115.6	115.6	116.9	113.4	116.5	117.6	121.3	122.4	129.3	117.9
		2006 141.5	138.0	141.0	151.4	165.5	142.2
Silver and platinum														
v1575305	20 49 01 2564	2005 127.6	137.9	137.9	136.3	136.5	140.8	133.1	132.2	131.2	141.2	144.3	153.1	137.7
		2006 162.4	163.8	179.7	213.5	221.0	177.8
Other non-ferrous metal refinery shapes														
v1575309	20 49 01 2570	2005 105.9	112.9	112.9	111.3	114.2	135.0	147.3	147.4	148.0	149.2	150.8	148.4	131.9
		2006 144.5	144.4	160.5	179.2	181.2	166.5
Secondary metals alloyed (non-ferrous)														
v1575323	20 49 03	2005 129.0	129.0	132.0	129.7	130.9	130.1	126.6	125.5	123.6	123.6	123.6	125.1	127.4
		2006 125.5	125.1	125.1	125.1	127.4	127.4
Manufactured products, other non-ferrous metals														
v1575326	20 49 04	2005 104.7	111.4	110.7	110.9	111.0	113.4	107.9	106.8	105.8	111.6	112.7	119.1	110.5
		2006 125.0	125.8	132.6	153.1	165.8	144.9
Precious metal basic manufactured shapes														
v1575327	20 49 04 4550	2005 115.3	126.0	125.1	124.9	124.0	128.6	120.0	118.5	117.9	127.9	129.7	140.3	124.9
		2006 148.8	149.4	160.5	193.8	214.9	179.3
Precious metal and alloys primary forms														
v1575336	20 49 91 0001	2005 117.6	125.1	125.2	124.3	124.0	127.4	120.8	121.0	120.9	128.7	130.6	139.5	125.4
		2006 149.4	148.8	158.3	183.8	199.4	166.3
Other non-ferrous base metals														
v1575337	20 49 91 0002	2005 83.1	82.6	75.4	80.6	75.5	73.7	72.2	76.0	76.2	71.9	69.2	73.1	75.8
		2006 70.6	68.8	72.2	76.3	76.1	74.0
METAL FABRICATED PRODUCTS														
v1575338	21	2005 121.6	122.3	122.2	122.3	121.9	121.5	121.0	120.7	120.7	121.1	121.2	121.5	121.5
		2006 121.6	121.8	121.8	122.2	122.7	123.2
Boilers, tanks and plates														
v1575339	21 50	2005 129.5	130.1	131.1	130.7	130.7	129.5	128.8	128.4	129.0	129.6	130.1	130.5	129.8
		2006 130.7	130.8	131.4	131.9	132.4	132.6
Power boilers and parts														
v1575340	21 50 01	2005 123.7	123.3	125.5	125.7	129.4	129.1	132.5	133.0	133.2	133.2	133.3	133.4	129.6
		2006 133.5	134.0	136.3	137.4	138.6	138.6
Tanks and plates														
v1575343	21 50 02	2005 131.6	132.5	133.1	132.5	131.2	129.6	127.4	126.7	127.5	128.3	129.0	129.5	129.9
		2006 129.7	129.6	129.6	129.8	130.2	130.4
Tanks														
v1575345	21 50 02 4621	2005 130.6	132.0	134.5	134.5	134.5	134.5	134.5	134.5	134.5	135.0	135.0	135.0	134.1
		2006 135.3	135.3	135.3	135.3	135.3	135.3
Fabricated structural metal products														
v1575346	21 51	2005 123.1	126.2	125.6	126.5	125.6	124.7	123.8	123.6	125.5	125.2	125.3	126.3	125.1
		2006 126.7	126.5	125.8	126.5	126.8	126.8
Structural shapes, steel including fabricated														
v1575348	21 51 01 4475	2005 119.6	123.7	121.7	120.9	118.4	116.6	114.7	114.9	122.1	119.7	119.8	122.8	119.6
		2006 122.8	122.6	120.8	121.5	123.0	123.1
Prefabricated metal building and structure														
v1575349	21 51 02	2005 128.9	133.1	132.6	135.3	134.3	132.9	131.6	131.1	132.3	132.5	132.6	133.5	132.6
		2006 134.5	133.9	133.3	134.2	134.4	134.5

Note: Indexes for the most recent six months shown are subject to revision.

Note: Indexes for the most recent six months shown are subject to revision.

- The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM series number (v nnnnnn) and a numeric descriptor. The numeric descriptor is of the order ss-mm-nn-pppp-rr where
ss indicates the S-level commodity code (from 9 to 28)
mm indicates the M-level commodity code (from 14 to 43, 45 to 69)
nn indicates the M-level commodity split, or 91, which indicates a special aggregation or 99, which indicates special details
pppp indicates the PCGA code (except for some special aggregations which include several PCGAs)
rr indicates a split of a PCGA.

		2006	122.6	123.5	124.2	124.5	124.5	124.6
Soap and cleaning compound manufacturing														
v3822669	32561	2005	108.2	109.5	108.3	108.5	108.3	108.4	109.9	110.1	110.2	110.3	110.2	109.3
		2006	111.8	112.1	112.2	112.1	112.3	112.7
Toilet preparation manufacturing														
v3822670	32562	2005	109.5	109.6	109.2	108.8	108.5	108.6	110.5	109.3	107.9	109.9	107.5	108.9
		2006	108.8	108.1	109.0	108.5	105.3	105.3
Other chemical product manufacturing														
v3822671	3259	2005	108.4	109.2	110.0	112.8	112.9	112.4	109.4	110.6	112.7	115.4	116.8	111.8
		2006	112.8	116.9	116.4	112.6	111.6	109.7
Plastic product manufacturing														
v3822673	3261	2005	112.8	112.7	113.6	113.9	114.1	113.7	113.6	114.0	114.5	118.1	119.3	115.0
		2006	119.7	118.8	118.8	118.5	118.0	118.2
Unsupported plastic film, sheet and bag manufacturing														
v3822674	32611	2005	113.3	111.8	113.6	114.0	114.7	115.4	114.3	116.0	117.0	121.1	122.1	116.3
		2006	122.5	120.4	120.3	120.2	118.0	118.4
Plastic pipe, pipe fitting and unsupported profile shape manufacturing														
v3822675	32612	2005	117.6	118.1	119.5	119.7	119.5	118.3	119.2	119.5	120.8	128.9	130.9	121.9
		2006	131.4	129.7	129.9	128.6	128.3	129.5
Polystyrene, urethane and other foam product manufacturing														
v3822677	32614, 32615	2005	113.4	113.4	113.7	113.8	113.8	113.7	113.5	113.6	114.9	115.7	116.2	114.3
		2006	116.7	116.5	116.4	116.3	116.1	116.3
Motor vehicle plastic parts manufacturing														
v3822680	326193	2005	97.4	97.6	97.2	97.4	97.5	97.4	97.3	96.7	96.5	96.8	97.1	97.2
		2006	96.9	96.8	96.9	96.8	96.5	96.5
Miscellaneous plastic product manufacturing														
v3822681	326191, 326198	2005	118.5	119.0	119.8	120.1	120.1	119.4	119.8	120.2	124.2	125.9	126.3	121.1
		2006	126.8	126.3	126.3	126.0	126.3	125.9
Rubber product manufacturing														
v3822682	3262	2005	101.7	102.0	102.4	102.5	102.5	102.9	103.0	104.0	104.0	104.2	104.2	103.1
		2006	103.8	105.3	105.3	105.2	105.0	105.0
Tire manufacturing														
v3822683	32621	2005	102.8	102.9	103.4	103.4	103.5	104.5	104.8	106.6	106.5	106.7	106.7	104.9
		2006	106.2	108.8	108.7	108.8	108.7	108.7
Rubber and plastic hose and belting manufacturing														
v3822684	32622	2005	120.5	121.2	122.2	122.0	122.0	121.9	121.8	122.0	122.1	122.6	122.7	122.0
		2006	123.5	123.3	123.2	123.1	123.2	123.2
Other rubber product manufacturing														
v3822685	32629	2005	94.8	95.5	95.3	95.7	95.7	95.1	95.0	95.0	95.2	95.3	95.1	95.2
		2006	94.7	94.8	95.0	94.8	94.0	94.0
Non-metallic mineral product manufacturing														
v3822686	327	2005	116.2	116.6	116.6	116.5	116.6	116.7	116.8	116.8	116.8	116.9	117.1	116.7
		2006	120.5	120.6	121.2	121.7	121.6	121.6
Clay product and refractory manufacturing														
v3822687	3271	2005	117.3	117.2	117.6	117.7	118.3	118.2	118.0	118.8	118.9	117.9	118.4	118.1
		2006	118.8	119.6	118.9	119.3	120.2	120.2
Glass and glass product manufacturing														
v3822688	3272	2005	101.2	101.5	101.6	101.6	101.7	101.6	101.5	101.6	100.8	100.9	100.9	101.3
		2006	103.0	102.9	103.4	102.7	102.6	102.4

Note: Indexes for the most recent six months shown are subject to revision.

All other miscellaneous manufacturing														
v3822799	33999	2005	113.1	113.5	113.5	114.3	114.5	114.5	114.0	114.1	113.8	114.3	114.6	115.2
		2006	116.3	116.1	116.4	117.0	117.9	116.2

Note: Indexes for the most recent six months shown are subject to revision.

1. The aggregation of indexes by commodity or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.
2. The numeric code to the right of the CANSIM series number on the last line of each series is the 1997 North American Industry Classification System (NAICS) code.

Explanation of methods used and additional sources for industrial price indexes

Industrial Product Price Indexes (1997=100)

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 980 Principal Commodity Group Aggregates (PCGA) outputs as defined in the 1997 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures. Such indexes are derived from prices reported for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about four weeks after the reference month in Statistics Canada's *The Daily* (Catalogue 11-001-XIE) following a pre-announced schedule of release dates. Simultaneously, all the indexes become available on CANSIM in Tables 329-0038 to 329-0049 or by request.

Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

Price Surveys

About 9,000 prices are collected monthly from about 3,000 producers for goods sold, which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure. Important producers are «must take» respondents. A random selection is taken from the smaller producers. These samples are redrawn on a regular cycle as dictated by changes in the market. A directly surveyed elemental index is usually supported by 12 to 15 price quotes. An index may be derived from as few as 8 quotes or as many as 30 quotes.

About 700 of the 980 PCGAs in the manufacturing sector are accommodated by direct survey and these account for about 90% of the value of manufacturing output in 1997.

The price movement for the other PCGAs is estimated indirectly from either directly priced PCGAs or through borrowing price movement from other price series.

Weight Base

Commodity and industry weights are taken from the «Make» matrix of the 1997 Input/Output table which, in turn, is derived from 1997 values reported for the Survey of Manufacturers and edited to conform to the 1997 North American Industry Classification System. However, each December, company/product weights within a commodity index can be changed in order to reflect important changes in production patterns.

Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically, as required, in December of each year. Weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where w are the values of the output of each commodity:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in the base period;

$P_{t/o}^i$ is the price index for element i , meaning its price change from the base period to time t ;

\sum_i indicates summation over all elements i in the defined aggregate.

Historical Data

Historical series on the 1997 base for the Industry Price Indexes are available on CANSIM. The historical series are computed for the industry indexes classified under the 1997 North American Industry Classification System (NAICS) and for commodity indexes classified under the Principal Commodity Group Aggregates (PCGA) classification. The historical series were obtained by linking together movements from the 1997-based Industrial Product Price Indexes (IPPI) series and the corresponding 1992-based Industrial Product Price Indexes (IPPI) series, using 1997 as the linking period. A set of concordance tables between both sets of IPPI series are available to the public.

Reference Documents

62-558-XPB Industry Price Indexes, 1986=100: Users' Guide, \$40.00.

This publication describes briefly the economic content of the series and presents a short description of different aggregations produced. In the tables the weighting patterns (1986) for both commodities and commodity groupings are shown. Descriptions of the characteristics of the elemental indexes are provided. Comments on index use are also provided.

62-556-XPB Industrial Product Price Indexes, 1981=100, Concepts and Methods, \$25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described, as are index calculation and aggregation procedures. A glossary of terms is also provided.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613) 951-9606, facsimile (613) 951-1539, Internet address prices-prix@statcan.ca.

Raw materials price indexes (1997 = 100)

The Raw Materials Price Indexes (RMPI) measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example, wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1997 time base, are published monthly in Statistics Canada's The Daily approximately four weeks after the end of the reference month. They are also available at that time on CANSIM in Table 330-0006.

Historical Data

The new historical series were obtained by linking together movements from the 1997-based Raw Material Price Indexes (RMPI) series and the corresponding 1992-based Raw Material Price Indexes (RMPI) series, using the year 1997 as the linking period. An explanatory note on the methods used to compute the historical series, as well as a set of concordance tables between both sets of RMPI series are available to the public.

Coverage

The index covers purchases of imported and domestically produced goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes net paid and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not

available, prices are taken for a similar commodity at the next stage of processing as occurred for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

Weight Base

Weights were derived from the 1997 Input/Output tables which provide values at purchasers' prices of commodities purchased as intermediate inputs.

Within individual commodity indexes, the prices are weighted according to their market share in a recent year. In a few instances, where data are not available, the price quotations are equally weighted.

Formula

Indexes for aggregates of individual raw materials are calculated according to the following formula:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in 1997;

$P_{t/o}^i$ is the price index for element i , meaning its price change from the base period o to time t ;

\sum_i indicates summation over all elements i in the defined aggregate.

Reference Document

See reference document in IPPI.

Electric Power Selling Price Indexes, Non-residential, (1997=100)

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales; for bills less than 5000 kW and for sales of 5000 kW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1997 as a time reference base and the weights used are 1992 company revenues from sales of electricity, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described in the explanation of methods used for the Industrial Product Price Indexes, 1997=100. The indexes are available on CANSIM in Table 329-0050. Indexes for the current year and the previous year are subject to revision.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613) 951-9606, facsimile (613) 951-1539, Internet address prices-prix@statcan.ca.

Looking for health information online?

Link up with Statistics Canada's *Guide to Health Statistics!*

The *Guide to Health Statistics* is a series of **online links** that lead you to health information published by Statistics Canada.

Let www.statcan.ca's *Guide to Health Statistics* be your passage to the world of health information. In the Guide you'll discover links to:

- ➔ vital statistics
- ➔ cancer statistics
- ➔ health determinants
- ➔ health status
- ➔ health care issues
- ➔ and much more. . .

Find the information you need now. Link up to a host of online products, documents and surveys like the National Population Health Survey. The *Guide to Health Statistics* allows you to search and locate exactly what you're looking for.

Save time. A few clicks and you'll be connected to health information from www.statcan.ca, your source for health facts and analysis.

Access anywhere, anytime. You get current detailed information quickly and efficiently thanks to continuous updates, regardless of location and time constraints.

Put the data to work. Copy text from online right into your documents and databases.

Expertise you can trust!

You can count on relevant dependable information with a unique focus on Canada-wide indicators from Statistics Canada. So, when you're on the lookout for first-rate health facts and analysis, allow the *Guide to Health Statistics* on www.statcan.ca to be your bridge to health information.

It's easy! Visit our site at www.statcan.ca, click on Canadian Statistics and then choose Health. Click on the *Guide to Health Statistics* banner and let your mouse lead the way.

Bookmark it!

Here are some of the handy links you'll find in the *Guide to Health Statistics*

Links to insightful analysis and data on:

➔ Cancer

Health Surveys

- ➔ Canadian Community Health Survey (CCHS)
- ➔ National Population Health Survey (NPHS)
- ➔ Smoking and Tobacco Use Surveys
- ➔ Health Care
- ➔ Therapeutic Abortions
- ➔ Vital Statistics

Sample links to related sites:

- ➔ Canadian Cancer Statistics
- ➔ Canadian Institute for Health Information (CIHI)
- ➔ Health Canada
- ➔ Canadian Health Network

Health information? We've got connections!

WHAT IF there were a place that could save you and your business time and money by offering a consolidated area with the latest in Canadian statistics?

WHAT IF there were a place that offered accessible and reliable data on an assortment of current hot topics on Canadian social and economic themes?

WHAT IF there were a place where analysis experts that know your markets could provide you with advice and customized data at your fingertips?

WHAT IF there were such a place?

THERE IS SUCH A PLACE.

Note of Appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Symbols

The following standard symbols are used in Statistics Canada publications:

- . not available for any reference period
- .. not available for a specific reference period
- ... not applicable
- 0 true zero or a value rounded to zero
- 0^s value rounded to 0 (zero) where there is a meaningful distinction between true zero and the value that was rounded
- ^p preliminary
- ^r revised
- x suppressed to meet the confidentiality requirements of the *Statistics Act*
- ^E use with caution
- F too unreliable to be published

Note on Cansim

CANSIM[®] (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

Highlights

Prices for manufactured goods at the factory gate rose sharply in July as prices for primary metal and petroleum products increased. Raw materials prices also increased in July, the result of higher prices for crude oil and non-ferrous metals.

Prices charged by manufacturers, as measured by the Industrial Product Price Index (IPPI), were up 1.7% in July following a 0.4% decline in June. Higher prices for primary metal products and petroleum products were the major contributors to this monthly increase.

Prices for manufactured goods are up

The 12-month change in the IPPI was up 4.3%, almost double the year-over-year increase of 2.2% in June. Upward pressure came mainly from higher prices for primary metal products and petroleum products.

The Raw Materials Price Index (RMPI) was up 5.2% from June to July following a 2.3% decrease in June. The increase was due primarily to higher prices for crude oil and non-ferrous metals.

Compared to July of last year, raw materials cost factories 19.0% more, up significantly from the year-over-year change of 14.8% in June.

The IPPI stood at 115.6 (1997=100) in July, up from 113.7 in June. The RMPI reached 175.1 (1997=100), up from a revised level of 166.4 in June.

IPPI: Higher prices for primary metals and petroleum products

On a month-over-month basis, manufacturers' prices were up 1.7%, mainly due to higher prices for primary metal products as well as petroleum products. This was the largest monthly increase since May 2004.

Prices for primary metal products rose 7.2% compared to June, a sharp contrast to the 5.2% decrease the previous month. Prices for nickel products surged 40.8% due to strong global demand and lower inventories. Higher prices were also observed for copper products (+13.2%), refined zinc products (+18.2%) as well as refined gold products (+11.8%).

Petroleum and coal products prices increased by 5.2%, considerably higher than the increases of 0.9% in May and 0.6% in June. If petroleum and coal product prices had been excluded, the IPPI would have increased 1.2% rather than 1.7%.

Motor vehicles and other transport equipment were up 0.9%, mainly due to the weaker Canadian dollar. Meat, fish and dairy products increased 1.3% as prices for fresh or frozen pork went up 9.0% in July.

Prices for pulp and paper products, lumber and other wood products, electrical and communication products as well as machinery and equipment also increased in July.

IPPI: Primary metal and petroleum products are the major contributors to the 12-month change

The IPPI was up 4.3% in July compared with the same month a year earlier, a significant increase from the year-over-year change of 2.2% in June and the largest increase since October 2004.

Prices for primary metal products were up 29.6% compared to a year ago. Prices for copper products (+101.5%), nickel products (+69.2%), refined zinc products (+173.9%) and aluminum products (+18.5%) were all higher compared with one year earlier.

Prices for petroleum and coal products rose 21.1% from July 2005, up slightly from June's increase of 20.2%. If petroleum and coal product prices had been excluded, the IPPI would have increased 2.6% rather than 4.3% from a year ago.

Prices were also higher than one year ago for chemical products, rubber, leather and plastic fabricated products, meat, fish and dairy products, pulp and paper products, metal fabricated products and non-metallic mineral products.

However, motor vehicles and other transport equipment prices were down 5.2% from a year ago, due to the stronger Canadian dollar.

Lumber and other wood products declined 4.0% compared to July 2005, as year-over-year decreases were recorded for softwood lumber (-6.3%) and particleboard (-13.6%).

Prices for electrical and communication products as well as machinery and equipment were also down from a year ago.

Raw materials prices are back up

RMPI: Crude oil and non-ferrous metals push up raw materials prices

Raw materials prices rose 5.2% in July, following a decrease of 2.3% in June.

Mineral fuels increased 6.0% compared to June. Prices for crude oil were up 7.5%, mainly due to concerns about supply disruptions. If mineral fuels had been excluded, the RMPI would have increased 4.5% instead of 5.2%.

Non-ferrous metals (+12.8%) rebounded in July, a significant change from the 10.9% decline in June. Higher demand and low inventories pushed up prices for zinc concentrates (+17.6%), copper concentrates (+17.2%), nickel concentrates (+38.9%), lead concentrates (+25.6%) and gold (+11.8%).

Prices for vegetable products and non-metallic minerals also contributed to the monthly increase but to a much lesser degree. On the other hand, prices for animal and animal products, ferrous materials and wood products decreased from June to July.

On a 12-month basis, the price of raw materials rose 19.0% in July, up from the 14.8% year-over-year increase in June.

Mineral fuels were up 16.0% with crude oil prices rising 18.8%. If mineral fuels had been excluded, the RMPI would have increased 22.6% instead of rising 19.0%.

Prices for non-ferrous metals rose 82.3%, mainly because of higher prices for zinc, copper, radio-active concentrates, nickel, gold and lead.

Prices for ferrous materials, vegetable products, wood products, animal and animal products and non-metallic minerals were also up from a year ago.

Impact of the exchange rate

The value of the Canadian dollar against the US dollar fell 1.4% between June and July. As a result, the total IPPI excluding the effect of the exchange would have risen 1.3% instead of its actual increase of 1.7%.

On a 12-month basis, the value of the Canadian dollar rose 8.3% against the US dollar. If the impact of the exchange rate had been excluded, producer prices would have risen 6.5% between July 2005 and July 2006, rather than their actual increase of 4.3%.

Higher prices for intermediate goods

Prices for intermediate goods increased 2.0% from June. Higher prices for primary metal products, petroleum products, pulp and paper products, meat, fish and dairy products, motor vehicles as well as lumber products were the major contributors to this monthly rise.

Producers of intermediate goods received 7.2% more for their goods this July than in July 2005. Higher prices were registered for primary metal products, petroleum products, rubber, leather and plastic fabricated products, chemical products, pulp and paper products, metal fabricated products, non-metallic mineral products, and meat, fish and dairy products.

These increases were partly offset by lower prices for lumber products, motor vehicles, fruit, vegetable and feed products and tobacco products.

Finished goods prices increase

Prices for finished goods were up 1.1% from June. Higher prices for petroleum products, motor vehicles, meat, fish and dairy products and electrical and communication products were the major contributors to the monthly increase.

Compared with July 2005, prices for finished goods inched up 0.2%. Higher prices were registered for petroleum products, tobacco products, meat, fish and dairy products, fruit, vegetable and feed products, chemical products, rubber, leather and plastic fabricated products as well as furniture and fixtures.

These increases were partly offset by lower prices for motor vehicles, electrical and communication products, machinery and equipment and lumber products.

Note to readers

The **Industrial Product Price Index (IPPI)** reflects the prices that producers in Canada receive as the goods leave the plant gate. It does not reflect what the consumer pays. Unlike the Consumer Price Index, the IPPI excludes indirect taxes and all the costs that occur between the time a good leaves the plant and the time the final user takes possession of it, including the transportation, wholesale, and retail costs.

Canadian producers export many goods. They often quote their prices in foreign currencies, particularly for motor vehicles, pulp, paper, and wood products. Therefore, a rise or fall in the value of the Canadian dollar against its US counterpart affects the IPPI.

The **Raw Materials Price Index (RMPI)** reflects the prices paid by Canadian manufacturers for key raw materials. Many of these prices are set in a world market. Unlike the IPPI, the RMPI includes goods not produced in Canada.

Text Table I

Industrial Product Price Indexes, by Stage of Processing (1997=100), Percentage Change From the Same Month a Year Earlier

Note: Indexes for the most recent six months shown are subject to revision.

- The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM series number (v nnnnnn) and a numeric descriptor.
The numeric descriptor is of the order ss-mm-nn-pppp-rr where
ss indicates the S-level commodity code (from 9 to 28)
mm indicates the M-level commodity code (from 14 to 43, 45 to 69)
nn indicates the N-level commodity split, or 91, which indicates a special aggregation or 99, which indicates special details
pppp indicates the PCGA code (except for some special aggregations which include several PCGAs)
rr indicates a split of a PCGA.

Table 3

Industrial Product Price Indexes, by Industry and Industry Groups (1997=100) - Continued

		Jan.	Feb.	March	April	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Annual average
Cement manufacturing														
v3822690 32731	2005 2006	120.7 123.9	120.6 124.1	120.9 124.4	120.9 124.0	120.8 124.6	120.9 124.7	120.9 124.8	120.3 ..	120.1 ..	121.0 ..	120.8 ..	121.2 ..	120.8 ..
Ready-mix concrete manufacturing														
v3822691 32732	2005 2006	117.4 123.5	117.3 123.2	117.2 123.8	117.4 124.9	117.3 124.6	117.3 124.6	117.4 124.9	117.4 ..	117.7 ..	117.9 ..	118.3 ..	118.2 ..	117.6 ..
Concrete product manufacturing														
v3822692 32733, 32739	2005 2006	115.5 120.7	115.6 120.6	115.6 120.7	115.6 121.7	115.8 121.6	115.8 121.6	116.0 121.7	116.0 ..	116.1 ..	116.5 ..	117.2 ..	117.2 ..	116.1 ..
Other non-metallic mineral product manufacturing														
v3822694 3279	2005 2006	115.7 121.2	116.2 122.0	116.5 123.0	116.7 124.2	116.5 124.4	116.9 125.0	116.9 125.1	117.0 ..	117.5 ..	117.5 ..	117.7 ..	117.8 ..	116.9 ..
Primary metal manufacturing														
v3822695 331	2005 2006	121.0 126.6	122.6 128.6	122.7 130.4	121.7 138.3	122.4 147.7	120.9 141.1	116.2 150.6	117.0 ..	114.6 ..	116.6 ..	119.2 ..	122.6 ..	119.8 ..
Iron and steel mills and ferro-alloy manufacturing														
v3822696 3311	2005 2006	131.6 114.9	130.0 115.1	128.1 114.8	126.1 115.6	124.2 116.2	120.5 117.3	113.5 117.8	111.7 ..	111.2 ..	113.3 ..	115.5 ..	115.1 ..	120.1 ..
Iron and steel pipes and tubes manufacturing from purchased steel														
v3822698 33121	2005 2006	122.7 121.9	123.9 122.1	121.6 121.0	120.4 120.9	120.6 121.4	118.2 122.4	118.8 122.4	116.6 ..	116.8 ..	119.0 ..	119.1 ..	119.7 ..	119.8 ..
Rolling and drawing of purchased steel¹														
v3822699 33122	2005 2006	133.3 123.5	131.9 123.7	130.5 123.5	129.5 123.0	127.8 122.7	127.5 123.0	123.9 122.9	123.5 ..	122.7 ..	123.2 ..	123.9 ..	123.8 ..	126.8 ..
Aluminum rolling, drawing, extruding and alloying														
v3822702 331317	2005 2006	92.6 95.1	93.5 96.9	94.3 98.1	94.1 98.1	94.0 100.0	93.1 97.4	92.3 98.3	91.6 ..	91.1 ..	91.3 ..	92.6 ..	93.2 ..	92.8 ..
Non-ferrous metal (except aluminum) smelting and refining														
v3822704 33141	2005 2006	131.0 161.2	136.9 163.3	139.1 168.3	138.3 196.5	146.4 222.2	147.2 203.0	138.7 240.6	144.2 ..	137.3 ..	140.1 ..	144.2 ..	152.7 ..	141.3 ..
Non-ferrous metal (except aluminum) rolling, drawing, extruding and alloying														
v3822705 33142, 33149	2005 2006	108.3 129.3	112.3 129.7	111.9 134.9	112.6 151.0	111.8 167.1	114.8 156.9	110.1 164.7	111.8 ..	111.7 ..	115.4 ..	116.7 ..	122.8 ..	113.4 ..
Ferrous metal foundries														
v3822707 33151	2005 2006	108.8 109.8	109.8 109.5	109.1 109.9	109.7 110.9	110.3 110.0	109.9 110.2	109.3 110.7	108.7 ..	107.9 ..	110.3 ..	110.5 ..	110.1 ..	109.5 ..
Non-ferrous metal foundries														
v3822708 33152	2005 2006	99.0 99.9	99.9 100.3	99.8 102.5	100.9 104.2	102.0 105.9	101.4 106.6	98.9 107.9	98.5 ..	98.0 ..	97.8 ..	98.5 ..	98.3 ..	99.4 ..
Fabricated metal product manufacturing														
v3822709 332	2005 2006	118.4 117.7	119.0 117.8	118.7 118.0	118.7 118.5	118.5 118.8	117.6 119.5	116.7 119.7	116.3 ..	116.2 ..	116.8 ..	117.1 ..	117.2 ..	117.6 ..
Forging and stamping														
v3822710 3321	2005 2006	122.9 113.7	121.8 113.6	120.6 113.8	119.2 114.3	118.2 114.8	115.6 115.7	111.2 116.0	110.5 ..	110.3 ..	112.0 ..	113.4 ..	113.2 ..	115.7 ..
Cutlery and hand tool manufacturing														
v3822711 3322	2005 2006	112.7 114.1	112.7 113.8	112.9 113.9	113.1 113.8	113.0 113.8	113.2 113.8	113.2 114.0	112.8 ..	112.7 ..	113.1 ..	113.2 ..	113.1 ..	113.0 ..
Architectural and structural metals manufacturing														
v3822712 3323	2005 2006	124.7 124.4	126.1 124.4	125.5 124.2	125.6 124.5	124.7 124.9	123.5 126.0	122.7 126.1	122.2 ..	122.9 ..	123.2 ..	123.4 ..	123.9 ..	124.0 ..
Prefabricated metal building and component manufacturing														
v3822714 332311	2005 2006	138.7 152.1	146.5 152.2	146.3 152.2	152.2 154.2	152.1 154.2	152.0 154.3	152.1 154.9	152.1 ..	152.0 ..	152.0 ..	152.1 ..	152.1 ..	150.0 ..
All other plate work and fabricated structural product manufacturing														
v3822715 332314, 332319	2005 2006	124.7 123.5	126.6 123.1	125.4 122.3	125.6 122.8	124.3 123.1	122.4 124.3	120.5 124.5	119.7 ..	121.5 ..	121.6 ..	121.8 ..	122.8 ..	123.1 ..
Boiler, tank and shipping container manufacturing														
v3822717 3324	2005 2006	115.4 117.5	116.0 117.8	116.9 118.1	117.6 118.8	118.1 118.7	117.5 118.4	117.4 119.0	117.0 ..	116.5 ..	116.6 ..	116.5 ..	117.0 ..	116.9 ..

		2006	108.3	108.3	108.5	108.4	108.1	108.2	108.4
Miscellaneous manufacturing															
v3822791	339	2005	111.4	113.3	113.3	113.1	113.3	113.7	112.5	112.6	112.5	114.0	114.3	116.4	113.4
		2006	118.4	118.4	119.9	124.2	127.4	121.5	125.2
Medical equipment and supplies manufacturing															
v3822792	3391	2005	115.4	115.9	115.9	115.6	116.0	116.2	116.7	116.7	116.6	116.9	116.8	118.3	116.4
		2006	118.6	118.6	118.8	118.6	118.8	118.5	118.8
Jewellery and silverware manufacturing															
v3822794	33991	2005	112.6	117.2	117.3	116.9	116.7	117.8	113.3	113.7	113.6	118.7	119.8	126.2	117.0
		2006	132.9	132.2	137.5	154.2	165.7	144.0	157.3
Sporting and athletic goods manufacturing															
v3822795	33992	2005	103.2	105.9	105.9	105.1	105.0	105.0	105.0	104.9	105.0	105.0	105.0	105.0	105.0
		2006	105.2	106.2	106.2	106.2	106.2	106.2	106.2
Doll, toy and game manufacturing															
v3822796	33993	2005	108.1	108.7	108.7	108.6	108.6	109.0	109.0	108.9	108.9	108.9	108.9	108.9	108.8
		2006	108.9	109.2	109.2	109.2	109.2	109.2	109.2
All other miscellaneous manufacturing															
v3822799	33999	2005	113.1	113.5	113.5	114.3	114.5	114.5	114.0	114.1	113.8	114.3	114.6	115.2	114.1
		2006	116.3	116.1	116.3	117.0	117.8	116.0	117.4

Note: Indexes for the most recent six months shown are subject to revision.

1. The aggregation of indexes by commodity or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.
2. The numeric code to the right of the CANSIM series number on the last line of each series is the 1997 North American Industry Classification System (NAICS) code.

Table 4

Industrial Product Price Indexes, by Stage of Processing (1997=100)

		Jan.	Feb.	March	April	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Annual average

Explanation of methods used and additional sources for industrial price indexes

Industrial Product Price Indexes (1997=100)

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 980 Principal Commodity Group Aggregates (PCGA) outputs as defined in the 1997 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures. Such indexes are derived from prices reported for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about four weeks after the reference month in Statistics Canada's *The Daily* (Catalogue 11-001-XIE) following a pre-announced schedule of release dates. Simultaneously, all the indexes become available on CANSIM in Tables 329-0038 to 329-0049 or by request.

Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

Price Surveys

About 9,000 prices are collected monthly from about 3,000 producers for goods sold, which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure. Important producers are «must take» respondents. A random selection is taken from the smaller producers. These samples are redrawn on a regular cycle as dictated by changes in the market. A directly surveyed elemental index is usually supported by 12 to 15 price quotes. An index may be derived from as few as 8 quotes or as many as 30 quotes.

About 700 of the 980 PCGAs in the manufacturing sector are accommodated by direct survey and these account for about 90% of the value of manufacturing output in 1997.

The price movement for the other PCGAs is estimated indirectly from either directly priced PCGAs or through borrowing price movement from other price series.

Weight Base

Commodity and industry weights are taken from the «Make» matrix of the 1997 Input/Output table which, in turn, is derived from 1997 values reported for the Survey of Manufacturers and edited to conform to the 1997 North American Industry Classification System. However, each December, company/product weights within a commodity index can be changed in order to reflect important changes in production patterns.

Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically, as required, in December of each year. Weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where w^i are the values of the output of each commodity:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in the base period;

$P_{t/o}^i$ is the price index for element i , meaning its price change from the base period to time t ;

\sum_i indicates summation over all elements i in the defined aggregate.

Historical Data

Historical series on the 1997 base for the Industry Price Indexes are available on CANSIM. The historical series are computed for the industry indexes classified under the 1997 North American Industry Classification System (NAICS) and for commodity indexes classified under the Principal Commodity Group Aggregates (PCGA) classification. The historical series were obtained by linking together movements from the 1997-based Industrial Product Price Indexes (IPPI) series and the corresponding 1992-based Industrial Product Price Indexes (IPPI) series, using 1997 as the linking period. A set of concordance tables between both sets of IPPI series are available to the public.

Reference Documents

62-558-XPB Industry Price Indexes, 1986=100: Users' Guide, \$40.00.

This publication describes briefly the economic content of the series and presents a short description of different aggregations produced. In the tables the weighting patterns (1986) for both commodities and commodity groupings are shown. Descriptions of the characteristics of the elemental indexes are provided. Comments on index use are also provided.

62-556-XPB Industrial Product Price Indexes, 1981=100, Concepts and Methods, \$25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described, as are index calculation and aggregation procedures. A glossary of terms is also provided.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613) 951-9606, facsimile (613) 951-1539, Internet address prices-prix@statcan.ca.

Raw materials price indexes (1997 = 100)

The Raw Materials Price Indexes (RMPI) measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example, wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1997 time base, are published monthly in Statistics Canada's The Daily approximately four weeks after the end of the reference month. They are also available at that time on CANSIM in Table 330-0006.

Historical Data

The new historical series were obtained by linking together movements from the 1997-based Raw Material Price Indexes (RMPI) series and the corresponding 1992-based Raw Material Price Indexes (RMPI) series, using the year 1997 as the linking period. An explanatory note on the methods used to compute the historical series, as well as a set of concordance tables between both sets of RMPI series are available to the public.

Coverage

The index covers purchases of imported and domestically produced goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes net paid and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not

available, prices are taken for a similar commodity at the next stage of processing as occurred for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

Weight Base

Weights were derived from the 1997 Input/Output tables which provide values at purchasers' prices of commodities purchased as intermediate inputs.

Within individual commodity indexes, the prices are weighted according to their market share in a recent year. In a few instances, where data are not available, the price quotations are equally weighted.

Formula

Indexes for aggregates of individual raw materials are calculated according to the following formula:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in 1997;

$P_{t/o}^i$ is the price index for element i , meaning its price change from the base period o to time t ;

\sum_i indicates summation over all elements i in the defined aggregate.

Reference Document

See reference document in IPPI.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario, K1A 0T6, telephone (613) 951-9606, facsimile (613) 951-1539, Internet address prices-prix@statcan.ca.

Electric Power Selling Price Indexes, Non-residential, (1997=100)

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales; for bills less than 5000 kW and for sales of 5000 kW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1997 as a time reference base and the weights used are 1992 company revenues from sales of electricity, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described in the explanation of methods used for the Industrial Product Price Indexes, 1997=100. The indexes are available on CANSIM in Table 329-0050. Indexes for the current year and the previous year are subject to revision.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613) 951-9606, facsimile (613) 951-1539, Internet address prices-prix@statcan.ca.
